Preface

M.H. PROTTER

Maximum principles 1

L.E. PAYNE

Some special maximum principles with applications to isoperimetric inequalities 15

G.A. PHILIPPIN

Applications of the maximum principle to a variety of problems involving elliptic differential equations 34

C.O. HORGAN

Some applications of maximum principles in linear and nonlinear elasticity 49

M.H. PROTTER

Overdetermined first order elliptic systems 68

M.H. PROTTER

Lower bounds for the spectrum of second order operators and systems of operators 82

C. COSNER

Spectrum, generalized spectrum, and eigenfunctions for second order elliptic systems 94

M.H. PROTTER

Universal inequalities for eigenvalues 111

H.A. LEVINE

Some remarks on inequalities between Dirichlet and Neumann eigenvalues 121

M.S. ASHBAUGH AND R. BENGURIA

Optimal lower bounds for eigenvalue gaps for Schrödinger operators with symmetric single-well potentials and related results 134

E.M. HARRELL II	
General bounds for the eigenvalues of Schrödinger operators	146
D. GURARIE	
Averaging methods in spectral theory of Schrödinger operators	167
M.H. PROTTER	
The asymptotics of eigenvalues	178
H.F. WEINBERGER	
Some remarks on invariant sets for systems	189
D. SIEGEL	
The Dirichlet problem in a half-space and a new Phragmén-Lindelöf principle	208
Y. PINCHOVER	
On positive solutions of elliptic equations with periodic coefficients in unbounded domains	218
