

## CONTENTS

### I. ALGORITHMS AND OPTIMIZATION METHODS

Quantitative Stability of (Mixed-)Integer Linear Optimization Problems <i>B. Bank and R. Mandel (GDR)</i>	3
Parallel Hybrid Optimization Methods <i>O. Burdakov (USSR) and C. Richter (GDR)</i>	16
Continuous Generalized Gradients for Nonsmooth Functions <i>V. F. Demyanov (USSR)</i>	24
Outer Cut Methods in Global Optimization <i>R. Horst (FRG)</i>	28
Generic Uniqueness of the Solution of "Max Min" Problems <i>P. S. Kenderov and N. K. Ribarska (Bulgaria)</i>	41
Optimal Stopping and Leavable Gambling Models with Observation Costs <i>M. Schäl (FRG)</i>	49
Multi-Ratio Fractional Programming - A Survey <i>S. Schaible (Canada)</i>	57

### II. OPTIMIZATION AND PARALLEL PROCESSING

An Experience of Advanced Computation Techniques in the Solution of Nonlinearly Constrained Optimization Problems <i>D. Conforti and L. Grandinetti (Italy)</i>	69
Automatic Differentiation and Parallel Processing in Optimisation <i>L. C. W. Dixon (Great Britain)</i>	86
Multicriteria Optimization in the DISO System <i>Y. Evtushenko, V. Mazourik and V. Ratkin (USSR)</i>	94
Serial and Parallel Solution of Large Scale Linear Programs by Augmented Lagrangian Successive Overrelaxation <i>R. De Leone and O. L. Mangasarian (USA)</i>	103
EMP: An Expert System for Mathematical Programming <i>K. Schittkowski (FRG)</i>	125
Effective Algorithm for Global Optimization with Parallel Computations <i>R. G. Strongin and Y. D. Sergeev (USSR)</i>	158

III. GRAPH THEORY AND SCHEDULING	
M-Machine Unit Time Scheduling: A Report on Ongoing Research <i>M. Bartusch, R. H. Möhring and F. J. Radermacher (FRG)</i>	165
On Inverse-Image of Non-Oriented Graphs <i>S. Perz and S. Rolewicz (Poland)</i>	213
IV. DIFFERENTIAL EQUATIONS AND OPERATOR THEORY	
Existence of Optimal Trajectory of Mayer Problem for Neutral Functional Differential Inclusions <i>M. Kisielewicz (Poland)</i>	227
Smooth Solutions of Linear Equations with Scalar Coefficients in a Right Invertible Operator <i>D. Przeworska-Rolewicz (Poland)</i>	232
V. APPLICATIONS	
Production-Pollution Cycles <i>G. Feichtinger (Austria)</i>	263
Location Problem and its Applications in Distribution of Petrol Products <i>B. Maźbicz-Kulma, E. Komorowska and J. Stępień (Poland)</i>	277
