

Contents

Preface	iii
Contributors	ix
1. Zygmund Classes with Boundary Conditions as Interpolation Spaces <i>Paolo Acquistapace</i>	1
2. Feedback Stabilization of Linear and Semilinear Parabolic Systems <i>Herbert Amann</i>	21
3. A Degenerate Parabolic Equation <i>Philippe Blanc</i>	59
4. Pointwise Inequalities for Schrödinger Semigroups <i>Jan A. van Casteren</i>	67
5. Perturbation Theory for Dual Semigroups IV: The Intertwining Formula and the Canonical Pairing <i>Philippe Clément, Odo Diekmann, Mats Gyllenberg, H. J. A. M. Heijmans, and H. R. Thieme</i>	95
6. Some Degenerate Fully Nonlinear Equations <i>Giuseppe Da Prato</i>	117
7. Some Generation Results for Perturbed Semigroups <i>Wolfgang Desch and Wilhelm Schappacher</i>	125
8. When Are Two C_0 Semigroups Related by a Bounded Perturbation? <i>Odo Diekmann, Mats Gyllenberg, and H. J. A. M. Heijmans</i>	153
9. Semigroup Methods for Two-Component Systems of Semilinear Hyperbolic Equations <i>William E. Fitzgibbon</i>	163
10. Positive Contraction Semigroups on $\mathcal{B}(H)$ and Quantum Stochastic Differential Equations <i>Alberto Frigerio</i>	175

11.	Degenerate Parabolic Problems and the Wentzel Boundary Condition <i>Jerome A. Goldstein and Chin-Yuan Lin</i>	189
12.	Semilinear Boundary Conditions for Evolution Equations of Hyperbolic Type <i>Günther Greiner</i>	201
13.	Well-Posedness of Hyperbolic Equations with Delay in the Boundary Conditions <i>Ronald Grimmer, R. Lenczewski, and Wilhelm Schappacher</i>	215
14.	Stabilization of Discrete Strongly Order-Preserving Semigroups and Dynamical Processes <i>Peter Hess</i>	231
15.	Exact Controllability of the Euler-Bernoulli Equation with Controls in the Dirichlet and Neumann Boundary Conditions: A Nonconservative Case <i>Irene Lasiecka and Roberto Triggiani</i>	241
16.	An Inverse Problem in the Theory of Materials with Memory II <i>Alfredo Lorenzi</i>	261
17.	Singular Perturbation and Operators of Finite Local Type <i>Günther Lumer</i>	291
18.	Structural Operators for Abstract Functional Differential Equations <i>Miklavž Mastinšek</i>	303
19.	Singular Perturbations of Parabolic Equations in L^p <i>Branko Najman</i>	315
20.	Semigroups in Spaces of Bochner Integrable Functions and Their Duals <i>Ben de Pagter</i>	331
21.	Hille-Yosida-Type Theorems for Integrodifferential Equations <i>Andrea Pugliese</i>	341
22.	Almost Periodic Subspaces Related to Operator Semigroups <i>Silvia Romanelli</i>	353
23.	Linear Hyperbolic Volterra Equations of Scalar Type <i>Jan Prüss</i>	367
24.	Hölder Regularity Results for Nonhomogeneous Parabolic Initial Boundary Value Linear Problems <i>Brunello Terreni</i>	387
25.	Approximation, Saturation, and Semigroups of Operators in Banach Spaces <i>Cees A. Timmermans</i>	403

26. Analytic Semigroups Generated in $H^{-m, p}$ by Elliptic Variational Operators and Applications to Linear Cauchy Problems <i>Vincenzo Vespri</i>	419
27. Applications of the Theory of Semigroups with Nondensely Defined Generators <i>Wolf von Wahl</i>	433
28. Semigroup Methods in Population Dynamics: Proliferating Cell Populations <i>Glenn F. Webb</i>	441
