

## Contents

Preface	iii
On the Jabotinsky Equations <i>J. Aczél and D. Gronau</i>	1
Global Decoupling of Coupled Symmetric Oscillators <i>J. C. Alexander and B. Fiedler</i>	7
Void Formation in Solidification <i>Vasilios Alexiades</i>	17
Forced Oscillations for Hamiltonian Systems <i>O. Arino and A. Cherif</i>	25
Eigenvalues, Bifurcation, and Center Manifolds in the Presence of Noise <i>Ludwig Arnold and Petra Boxler</i>	33
An Unusual Wave Equation Arising in Water-Wave Theory <i>G. A. Athanassoulis and G. N. Makrakis</i>	49
Controllability and Approximate Controllability for Linear Integral Volterra-Stieltjes Equations <i>Luciano Barbanti</i>	57
Determinants for Formally Hyperbolic Differential Equations <i>P. Berglez</i>	63
On Two New Applications of Gurtin's Coordinate Transformation <i>M. Bertsch and D. Hilhorst</i>	71
On the Thermal Stability of a Chemically Reacting Gas in a Porous Sphere <i>A. R. Bestman</i>	81
Higher Regularity of Solutions of Semilinear Evolution Equations and Applications <i>Moses A. Boudourides and Apostolos C. Nikoudes</i>	87
The Maximal Attractor of the Scalar Reaction Diffusion Equation <i>Pavol Brunovský</i>	93

Stability of Bifurcating Solutions of Reaction-Diffusion Equations in Cylindrical Domains <i>A. Calsina</i>	99
Numerical Evaluation of the Solutions to the Equations of Elastostatics for a Stratified Sphere <i>L. Carlomusto and A. Pianese</i>	109
Existence of Positive Exponentially Decreasing Solutions for Nonlinear Differential Equations in $\mathbb{R}$ with an Unbounded Coefficient <i>Alice Chaljub-Simon</i>	119
A Shadowing Lemma for Maps in Infinite Dimensions <i>Shui-Nee Chow, Xiao-Biao Lin, and Kenneth J. Palmer</i>	127
Asymptotic Method for Invariant Solutions of $\mathbb{R}^m$ Maps <i>R. L. Clerc and C. Hartmann</i>	137
Orthogonal Polynomials in Symmetrical Domains of $\mathbb{R}^m$ <i>Jan Cnops</i>	145
Hyperbolic Conservation Laws with Memory <i>C. M. Dafermos</i>	157
Fully Nonlinear Equations in Banach Spaces <i>Giuseppe Da Prato</i>	167
On the Number of Solutions of Some Semilinear Boundary Value Problems <i>Marcel d'Aujourd'Hui</i>	173
Some Nonlinear Sturmian Theory for $( u' ^{p-2}u')' + c(t) u ^{p-2}u = 0$ <i>Manuel Del Pino and Raúl Manásevich</i>	183
A Very Short Survey of Non Standard Analysis' Contribution to the Theory of Ordinary Differential Equations <i>Francine Diener and Marc Diener</i>	191
A New Approach to Inverse Problems in Linear Kinetic Theory <i>Klaus Dressler</i>	199
Bounded Entire Solutions of Higher Order Semilinear Equations <i>Allan L. Edelson and Ramin Vakilian</i>	207
Minors of the Wronskian of the Differential Equation $L_n y + p(x)y = 0$ and Their Applications <i>Uri Elias</i>	215
Explicit Solutions of the Fokker-Planck Equation <i>M. J. Englefield</i>	223
Full and Half-Range Eigenfunction Expansions for an Elliptic Boundary Value Problem Involving an Indefinite Weight <i>M. Faierman and G. F. Roach</i>	231

The General Similarity Solution of Laplace's Equation with Applications to Boundary-Value Problems <i>Chao-Kang Feng</i>	237
Uniform Asymptotic Stability in Functional Differential Equations <i>Tetsuo Furumochi</i>	249
Removability of Blowup Points for Semilinear Heat Equations <i>Yoshikazu Giga and Robert V. Kohn</i>	257
Behavior of the Nonoscillatory Solutions of First Order Neutral Delay Differential Equations <i>John R. Graef, Myron K. Grammatikopoulos, and Paul W. Spikes</i>	265
Some Stability-Type Results for Second Order Nonlinear Differential Equations <i>J. R. Graef, L. Hatvani, J. Karsai, and P. W. Spikes</i>	273
Optimal Control and Integral Equations <i>Gustaf Gripenberg</i>	283
Oscillation of Neutral Delay Differential Equations Arising in Population Dynamics <i>Istvan Györi</i>	291
Shadow Systems for Evolutionary Equations <i>Jack K. Hale</i>	303
On Periodic-Parabolic Boundary Value Problems <i>Peter Hess</i>	311
Periodic Solutions of a Linear Volterra System <i>Yoshiyuki Hino and Satoru Murakami</i>	319
On Multiple Periodic Solutions for Semilinear Wave Equations with Forcing Terms <i>Norimichi Hirano</i>	327
Explicit Solutions for Riccati Operator Differential Equations <i>Lucas Jódar</i>	335
On Differential Inclusions of Second Order <i>Tomasz Kaczynski</i>	343
Continuous Symmetrization and Related Problems <i>Bernhard Kawohl</i>	353
Lyapunov Stability and Attractors <b>Under Discretization</b> <i>Peter E. Kloeden and J. Lorenz</i>	361
A Method for Approximate Construction of Solution of First Order Differential Equations <i>Cevdet Koçak</i>	369

An Existence Theorem for Nonlinear Random Differential Inclusions <i>Dimitrios Kravvaritis and Nikolaos Stavrakakis</i>	373
Linearized Oscillations for Neutral Equations <i>G. Ladas</i>	379
Existence Theorems for Second Order Differential Equations with Piecewise Constant Argument <i>G. Ladas, E. C. Partheniadis, and J. Schinas</i>	389
Oscillations of Second Order Neutral Equations <i>G. Ladas, E. C. Partheniadis, and Y. G. Sficas</i>	397
Monotonicity Results and Inequalities for the Zeros of Generalized Airy Functions <i>Andrea Laforgia and Elisabetta Santi</i>	403
Asymptotic Behavior of Solutions to Quasilinear Schrödinger Equations <i>H. Lange</i>	411
The Vibrations of a "Fractal Drum" <i>Michel L. Lapidus and Jacqueline Fleckinger</i>	423
A Numerical Approach to the Dynamic Nonconvex Unilateral Problem of Soil-Pile Interaction <i>Asterios A. Liolios</i>	437
General Theory of Regular Solutions and Hyposolutions of the Homogeneous Equation $du/dt = Au$ <i>Guizhang Liu</i>	445
Numerical Aspects of Waveform Relaxation <i>Peter Lory</i>	451
Asymptotics of Solutions of the Equation $y'' = f(g(x))\phi(\psi(y))$ <i>Vojislav Marić and Zvezdana Radašin</i>	459
A Result of Homogenisation for a Viscoelastic Equation with Non-Periodic Coefficients <i>Maria-Luisa Mascarenhas</i>	467
Exterior Stationary Problems for the Equations of Motion of Compressible Viscous and Heat-Conductive Fluids <i>Akitaka Matsumura and Takaaki Nishida</i>	473
On Boundary Value Problems for ODE with Parameters <i>R. M. M. Mattheij</i>	481
Continuous Orthonormalization with Application to Burgers' Equation <i>Gunter H. Meyer</i>	491
Diffusion Equations as Singular Limits of Damped Wave Equations <i>Xavier Mora and Joan Solà-Morales</i>	499

Some Properties of Phase Spaces for Functional Differential Equations with Infinite Delay <i>Satoru Murakami and Toshiki Naito</i>	507
Qualitative Behaviour of the Solutions of the Hamiltonian Systems $H(r, \theta, p_r, p_\theta) = p_r^2/2 + p_\theta^2/2r^2 + V(r, \theta)$ , $V(r, \theta) = -ar^{-n}(\mu \cos^2 \theta + \sin^2 \theta)^{-n/2}$ , $\mu \in [1, \infty)$ , $a \in \mathbb{R}^+$ , $n \in \mathbb{R}^+ \setminus \{2\}$ . Part One: Case $n \in (2, +\infty)$ <i>A. Nunes and J. Casasayas</i>	515
Qualitative Behaviour of the Solutions of the Hamiltonian Systems $H(r, \theta, p_r, p_\theta) = p_r^2/2 + p_\theta^2/2r^2 + V(r, \theta)$ , $V(r, \theta) = -ar^{-n}(\mu \cos^2 \theta + \sin^2 \theta)^{-n/2}$ , $\mu \in [1, \infty)$ , $a \in \mathbb{R}^+$ , $n \in \mathbb{R}^+ \setminus \{2\}$ . Part Two: Case $n \in (0, 2)$ <i>J. Casasayas and A. Nunes</i>	525
Semiperiodic Boundary Value Problems <i>P. K. Palamides and L. H. Erbe</i>	533
Nonlinear Variational Eigenvalue Inclusions <i>Dan Pascali</i>	543
On Minimal Realizations of Integral Operators with Semi-Separable Kernels <i>Gerrit Peeters</i>	553
Elliptic Equations with Nearly Critical Growth <i>L. A. Peletier</i>	561
A Preliminary Model for the Cracking of Shrinking Crusts Sliding with Friction <i>C. Perelló</i>	575
Nonlocal Regularization of Some Overdetermined Boundary Value Problems <i>N. I. Popivanov</i>	581
Nine-Point Finite-Difference Scheme for Solving Elliptic Equations with Application in Capillary Instability of Viscous Jet in Inviscid Medium <i>Vaia Rakidzi and Stefan Radev</i>	587
Identification of a Non-Linear, Stochastic, and Integral Equation <i>A. G. Rigas</i>	597
On the Continuous Dependence for the Capillarity Problem with Obstacle <i>José-Francisco Rodrigues</i>	605
Operational Fractional Calculus of Kratzel Integral Transformation <i>J. Rodríguez, J. J. Trujillo, and M. Rivero</i>	613

Geometrical Structure of Attractors of Slow-Fast Dynamical Systems: The Double Scroll Chaotic Oscillator <i>B. Rossetto</i>	621
The Exterior Nonstationary Problem for the Navier-Stokes Equations in Regions with Moving Boundaries <i>Rodolfo Salvi</i>	629
Monotonicity Properties of Solutions to Systems of Differential Equations Arising in Chemical Kinetics <i>David Siegel</i>	637
On a Nonstationary Motion of a Finite Mass of a Liquid Bounded by a Free Surface <i>V. A. Solonnikov</i>	647
Realization of Transfer Functions by Equations of Parabolic Type <i>F. Szigeti</i>	655
On the Converse of a Theorem of Milloux, Prodi, and Trevisan <i>József Terjeki</i>	661
Uniqueness of Solutions for Problems Arising in Population Genetics <i>Achilles Tertikas</i>	667
Generalized Solutions of Mixed Problems for Quasilinear Hyperbolic Systems of Functional Partial Differential Equations <i>Jan Turo</i>	673
On the First Fourier Problem for Some Integro-Differential Equation of Parabolic Type <i>Henryk Ugowski</i>	679
Invariant Regions for a Hyperbolic Version of the FitzHugh-Nagumo Equation <i>Marta València</i>	683
An Existence Theorem for Non-Homogeneous Inviscid Incompressible Fluids <i>Alberto Valli</i>	691
A Small Concentration Expansion for the Effective Heat Conductivity of a Random Disperse Two-Component Material: An Assessment of Batchelor's Renormalization Method <i>P. van Beek</i>	699
Secondary Bifurcations in Symmetric Systems <i>A. Vanderbauwhede, M. Krupa, and M. Golubitsky</i>	709
On Controllability of Fisher's Model of Selection <i>Z. Varga</i>	717

The Small Dispersion Limit of the Korteweg-de Vries Equation <i>Stephanos Venakides</i>	725
Analytic Semigroups Generated in $C^{-1,\alpha}$ , by Second Order Variational Operators and Application to Nonlinear Cauchy Problem <i>Vincenzo Vespri</i>	739
Bifurcation of a Class of Partial Differential Equation Systems <i>M. C. Vincourt</i>	749
Über die Differentialgleichung $y'' = f(x,y)$ <i>Peter Volkmann</i>	755
Stability of Nonlinear Stochastic Systems <i>W. Wedig</i>	763
Some Problems in Stability of the Equilibrium Related to Coexistence of Solutions to Hill's Equations <i>Gaetano Zampieri</i>	773
Index	781
