

CONTENTS

Preface	v
Photograph of John R. Myhill (1923–1987)	vii
Model Theory of Henselian Valued Fields F. Delon	1
On the Foundations of Mathematics in 1987 F.R. Drake	11
Logic and Natural Language Systems J.E. Fenstad	27
Model Theory of Regular and Compact Spaces J. Flum	41
Categoricity and Permutation Groups W. Hodges	53
Unidimensional Theories. An Introduction to Geometric Stability Theory E. Hrushovski	73
Unbounded Filters on ω J.I. Ihoda	105
Type Theory and Explicit Mathematics G. Jäger	117
An Introduction to Extenders and Core Models for Extender Sequences P. Koepke	137
Logical Aspects of the Axiomatic Method: On Their Significance in (Traditional) Foundations and in Some (Now) Common or Garden Varieties of Mathematics G. Kreisel	183

On the Use of Diagonally Nonrecursive Functions A. Kučera	219
Some Aspects of Impredicativity: Notes on Weyl's Philosophy of Mathematics and on Today's Type Theory G. Longo	241
General Logics J. Meseguer	275
Semantic Parallels in Natural Language and Computation J. Van Benthem	331
