

# Table of Contents

Preface . . . . .	VII
Foreword . . . . .	IX
<i>J. F. Bonnans</i>	
An introduction to Newton type algorithms for nonlinearly constrained optimization problems . . . . .	1
<i>Y. Cherruault</i>	
Une méthode d'optimisation globale: Aliénor . . . . .	19
<i>F. Dieu</i>	
Traitemen des problèmes d'optimisation de grande taille avec contraintes fortement non linéaires . . . . .	27
<i>R. Fletcher</i>	
A first derivative method for nonlinear programming based on successive $l_1$ LP . . . . .	43
<i>D. Girard and P. Valentin</i>	
Zonotopes and mixtures management . . . . .	57
<i>B. Lemaire</i>	
The proximal algorithm . . . . .	73
<i>C. Lemaréchal</i>	
Mathematical classification of optimization problems . . . . .	89
<i>T. Pham Dinh and S. El Bernoussi</i>	
Numerical methods for solving a class of global nonconvex optimization problems . . . . .	97
<i>A.H.G. Rinnooy Kan and G.T. Timmer</i>	
Global optimization: a survey . . . . .	133
<i>K. Schittkowski</i>	
Knowledge based integrated software systems in mathematical optimization . . . . .	157
<i>P. Tolla</i>	
Elaboration de logiciels efficaces utilisant l'algorithme de Karmarkar . . . . .	173
<i>J.-P. Udry</i>	
Applications of simulated annealing in operation research . . . . .	191
<i>P. Terpolilli and A. Roger</i>	
Trust region strategies with Quasi-Newton schemes . . . . .	205
<i>J. Vignes</i>	
Optimal implementation of optimization methods and estimation of the accuracy of the results . . . . .	219
