

CONTENTS

PART I: RESULTS ON ORDINARY DIFFERENTIAL EQUATIONS, DIFFERENTIAL ALGEBRAIC EQUATIONS AND DELAY EQUATIONS

P. ALBRECHT (Dortmund)	The extension of the theory of A-methods to RK-methods	8
H. ARNDT (Bonn), C.T.H. BAKER (Manchester)	Runge-Kutta formulae applied to Volterra functional equations with a fixed delay	19
W. AUZINGER, R. FRANK, F. MACSEK (Vienna)	On asymptotic expansions of the discretization error for stiff equations	31
H. CLAUS (Halle)	SIRK-methods for stiff retarded differential equations	40
G. DAHLQUIST (Stockholm), R. JELTSCH (Aachen)	Shifted Runge-Kutta methods and transplanted differential equations	47
E. GRIEPENTROG (Greifswald)	Transformations of differential-algebraic equations	57
E. HAIRER, CH. LUBICH (Geneva)	On extrapolation methods for stiff and differential algebraic equations	64
M. HERMANN (Jena)	Shooting algorithms for two-point BVPs	74
A. ISERLES (Cambridge)	Dynamical systems and nonlinear stability theory for numerical O.D.E.'s	84
H.W.J. LENFERINK, M.N. SPIJKER (Leiden)	The relevance of stability regions in the numerical solution of initial value problems	95
R. MÄRZ (Berlin)	Recent results on higher-index differential-algebraic equations	104

S. NAMASIVAYAM, E.L. ORTIZ (London)	
A hierarchy of truncation error estimates for the numerical solution of a system of ordinary differential equations with techniques based on the Tau method	113
D.A. QUINNEY (Keele), A. CROFT (Crewe)	
Extrapolation - new solutions from OLD	122
M. ROCHE (Geneva)	
Differential algebraic systems and very stiff equations . . .	130
R. SCHERER (Karlsruhe), H. TÜRKE (Stuttgart)	
The construction of A-stable Runge-Kutta methods	138
S. SCHOLZ (Dresden)	
Order barriers for SDIRK and ROW methods	146
K. STREHMEL, R. WEINER (Halle)	
Order results for linearly implicit Runge-Kutta methods applied to semi-linear stiff systems	153
M. van VELDHIJZEN (Amsterdam)	
On the approximation of an invariant curve	164
PART II: RESULTS ON PARTIAL DIFFERENTIAL EQUATIONS AND RELATED TOPICS	
O. AXELSSON (Nijmegen)	
Finite element methods for convection-diffusion problems . .	171
I. FARAGÓ (Gödöllő)	
Some results of Galerkin's method for the solution of nonlinear parabolic system	184
V. FRIEDRICH, N. SIEDOW (Karl-Marx-Stadt)	
Locally one-dimensional schemes for parabolic initial-boundary problems - a critical view	190
R.D. GRIGORIEFF (Berlin-West)	
On the behaviour of stability constants in discretisations of nonlinear problems	196
P.J. van der HOUWEN (Amsterdam)	
Stabilization of explicit difference schemes by smoothing techniques	205
J.C. LOPEZ-MARCOS, J.M. SANZ-SERNA (Valladolid)	
A definition of stability for nonlinear problems	216

H.-G. ROOS (Dresden)	
A uniformly enclosing discretization method for linear parabolic boundary value problems	227
J.W. SCHMIDT (Dresden)	
Unconstrained dual programs to some discretized variational problems with side conditions	232
U. TAUTENHAHN (Karl-Marx-Stadt)	
Parameter identification in parabolic equations	237
J.G. VERWER (Amsterdam)	
Some stability results for the hopscotch difference method when applied to convection-diffusion equations . . .	243
 PART III: APPLICATIONS IN SCIENCE AND TECHNOLOGY	
R. ANSORGE (Hamburg), M.L. BLANCK (Sindelfingen)	
On the numerical treatment of Prandtl's boundary-layer equations via Crocco's transformation	253
H.G. BOCK, E. EICH, J.P. SCHLÖDER	
Numerical solution of constrained least squares boundary value problems in differential-algebraic equations	269
E. BOHL, R. KREIKENBOHM (Konstanz)	
On a mathematical model for the interaction of two populations	281
K. BÖHMER, B.A. SCHMITT (Marburg)	
Highly accurate solutions of the Hartree-Fock equations via defect corrections	289
R. KREUL, H. KRETZSCHMAR (Karl-Marx-Stadt)	
On mathematical modelling of non-newtonian flow by perturbation methods	295
M. KUBIČEK, M. HOLODNIOK (Prague)	
Periodic phenomena in reaction diffusion systems - numerical analysis	299
P. RENTROP, G. STEINEBACH (Kaiserslautern)	
The numerical solution of implicit ordinary differential equations arising in vehicle dynamic ⁺⁾	306
Address list of contributors	314

⁺⁾ The lecture could not take place but is presented here.
