

Contents

R. KLÖTZLER (Leipzig)	6
Optimalität und Mathematik.	
G. AKRIVIS, [V. DOUGALIS] (Iraklion)	
On a high-order accurate Galerkin-type full discretization of the Schrödinger equation.	18
A. BÖTTCHER, B. SILBERMANN (Karl-Marx-Stadt)	
Asymptotics of Toeplitz and Wiener-Hopf operators.	27
J. BRILLA (Bratislava)	
On analysis of time dependent problems of mathematical visco- elasticity.	36
H. ENGL (Linz)	
Regularization of ill-posed problems : convergence rates. . .	42
R. GOLDSTEIN (Moscow)	
Boundary integral equations and boundary functionals in three- dimensional crack problems in elasticity.	52
H. GRÜNDEMANN (Karl-Marx-Stadt)	
Boundary element homogenization of composite materials. . . .	62
W. HACKBUSCH (Kiel)	
The frequency decomposition multi-grid method as new approach to robust solvers.	76
[J. HASLINGER (Prague)], P. NEITTAANMÄKI (Jyväskylä)	
Optimal shape design in contact problems of elasticity. . . .	84
B. HEINRICH (Karl-Marx-Stadt)	
Nonclassical Finite Difference Methods on irregular networks for elliptic problems.	94
B. HOFMANN (Karl-Marx-Stadt)	
On some classes of ill-posed integral equations.	104
L. JENTSCH (Karl-Marx-Stadt)	
Über Randintegralmethoden bei Randkontaktaufgaben.	110
A. KOSHELEV, [V. CHISTJAKOV] (Leningrad)	
The regularity of solutions for some problems of mathematical physics.	120
A. KUFNER (Prague)	
Solution of nonlinear boundary value problems in weighted Sobolev spaces.	130
V. KUKUDŽANOV (Moscow)	
The mathematical modelling of dynamic elastoplastic processes of large deformations and damage.	138

U. LANGER (Karl-Marx-Stadt)	
Applications of multigrid preconditioners to mixed and non-linear variational problems.	148
V. LELEK (Rež), I. MAREK (Prague)	
Data fitting under eigenvalue constraints.	159
P. MAISSER (Karl-Marx-Stadt)	
Analytical dynamics of multi-rigid-body systems.	167
E. MEISTER, [F.-O. SPECK] (Darmstadt)	
Matrix factorization for canonical Wiener-Hopf-Problems in elastodynamic scattering theory	175
G. MONEGATO (Torino)	
Orthogonal polynomials and product integration for one-dimensional Fredholm integral equations with "nasty" kernels.	185
N. MOROZOV, [M. PAUCSHTO] (Leningrad)	
Cracks simulation and solitons in the lattice.	193
D. NATROSHVILI, [M. SVANADZE] (Tbilissi)	
Potential methods in the problems of linear theory of elastic mixtures.	199
F. NATTERER (Münster)	
Mathematische Methoden in der Tomographie.	207
Z. OLESIAK (Warsaw)	
Stresses in solid bodies exerted by thermodiffusive effects.	217
S. PROSSDORF (Berlin)	
Recent results in numerical analysis for singular integral equations.	224
J. vom SCHEIDT (Zwickau)	
Random equations of mathematical physics.	235
E. SCHNACK, [N. KARAOSMANOGLU, I. BECKER] (Karlsruhe)	
Modelling of finite element functions using generalized BEM.	245
B.-W. SCHULZE (Berlin)	
Topologies and invertibility in operator spaces with symbolic structures.	257
L. von WOLFERSDORF (Freiberg)	
Potential flows past a circular cylinder with permeable surface.	271
Addresses	279
Further main lectures	280

(The brackets indicate co-authors who were not main lecturers of the conference.)
