List of conference participants

List of unpublished communications

1. PARABOLIC EQUATIONS

S.N. Antontsev and J.I. Diaz

On space or time localization of solutions of nonlinear elliptic or parabolic equations via energy methods 3

C. Bandle

Blow up in exterior domains 15

B. Biler

Blow up in the porous medium equation 28

V. Caselles

Duality and nonlinear equations governed by accretive operators 39

F. Conrad, D. Hilhorst and T.I. Seidman

On a reaction-diffusion equation with a moving boundary 50

J. Goncerzewicz

Porous medium-type equations with irregular boundary data 59

N. Kenmochi and M. Kubo

Periodic behaviour of solutions to a parabolic-elliptic problem 68

M. Langlais

Asymptotic behaviour in some evolution equations arising in population dynamics 77

M.S. Moulay and M. Pierre

About regularity of the solutions of some nonlinear degenerate parabolic equations 87

2. TIME-DEPENDENT SYSTEMS

P. Acquistapace and B. Terreni

Fully nonlinear parabolic systems 97

S. Amraoui

On the bifurcation at double critical values for the Brusselator 112

M. Artola

Existence and uniqueness for a diffusion system with coupling 123

P. Bénilan and H. Labani

Existence of attractors for the Brusselator 139

L.C. Evans

Some asymptotics for reaction-diffusion PDEs 152

G. Gagneux, A.M. Lefevre and M. Madaune-Tort

An implicit time-stepping scheme for polyphasic flows in porous media including coupled quasi-linear inequalities 161

M.A. Pozio and A. Tesei

Global existence of solutions for a strongly coupled semilinear parabolic system 172

3. ELLIPTIC EQUATIONS AND SYSTEMS

C.J. Amick and R.E.L. Turner

Elliptic equations, internal waves and dynamical systems 187

P. Baras

Semilinear problem with convex nonlinearity 202

J. Blat and J.M. Morel

Elliptic problems in image segmentation and their relation to fracture theory. 216

L. Boccardo, J.I. Diaz, D. Giachetti and F. Murat

Existence of a solution for a weaker form of a nonlinear elliptic equation 229

L. Boccardo and F. Murat

Strongly nonlinear Cauchy problems with gradient-dependent lower order nonlinearity 247

M. Chipot, A. Feggous and G. Michaille Monotonicity properties for variational inequalities associated with strongly nonlinear diagonal systems	255
P. Clément and G. Sweers On subsolutions to a semilinear elliptic problem	267
I. Fonseca Remarks on phase transitions	274
A. Henrot and M. Pierre About existence of a free boundary in electromagnetic shaping	283
ii. Labani and C. Picard Homogenization of a nonlinear Dirichlet problem in a periodically perforated domain.	294
J.P. Puel Some results on quasi-linear elliptic equations	306
J.F. Rodrigues Some remarks on the quasi-linear noncoercive elliptic obstacle problem	319
A. Visintin Generalized coarea formula	333
