

TABLE OF CONTENTS / TABLE DES MATIERES

I - DIFFERENTIAL GEOMETRIC SYSTEM THEORY

1 - STRUCTURAL PROPERTIES

Characterizations of Hamiltonian control systems.	3
B. JAKUBCZYK (POLAND)	
Invariants in the feedback classification of nonlinear systems.	13
B. BONNARD (FRANCE)	
On normal forms of affine systems under feedback.	23
K. TCHON (POLAND)	
Transformations of nonlinear systems under external equivalence.	33
A. J. VAN DER SCHAFT (THE NETERLANDS)	
Tracking through singularities.	44
F. LAMNABHI (FRANCE) P. E. CROUCH, I. IGHNEIWA (U.S.A.)	
Controllability of right-invariant systems on semi-simple Lie groups.	54
R. EL ASSOUDI, J.P. GAUTHIER (FRANCE)	

2 - FEEDBACK SYNTHESIS

Stable noninteracting control.	67
J.W. GRIZZLE (U.S.A.), A. ISIDORI (ITALY)	
Towards the solution of the nonlinear block decoupling problem.	77
J. DESCUSSE (FRANCE)	
Linearization of discrete and discretized nonlinear systems.	91
H.G. LEE, A. ARAPOSTATHIS, S.I. MARCUS (U.S.A.)	
A condition for the solvability of the nonlinear model matching problem.	102
M.D. DI BENEDETTO (ITALY)	

3 - OBSERVERS

Synthesis of nonlinear observers : a harmonic analysis approach.	119
F. CELLE, J.P. GAUTHIER, G. SALLET (FRANCE)	
Regularly persistent observers for bilinear systems.	130
G. BORNARD, N. COUENNE, F. CELLE (FRANCE)	

II - ALGEBRAIC SYSTEM THEORY

A short introduction to differential Galois theory. J.P. RAMIS (FRANCE)	143
Linear algebra and nonlinear control. C.H. MOOG (FRANCE)	160
Some remarks on nonlinear input-output systems with delays. M. FLIESS (FRANCE)	172
Nonlinear state space and input-output descriptions using differential polynomials. S.T. GLAD (SWEDEN)	182
A state elimination procedure for nonlinear systems. S. DIOP (FRANCE)	190

III - OPTIMAL CONTROL

A new regularity theorem for bang-bang trajectories. H. J. SUSSMANN (U.S.A.)	201
On Volterra approximations. G. STEFANI (ITALY)	212
The Lie saturate and its applications to singular control problems. V. JURDJEVIC (U.S.A.)	222
Degenerate linear systems with quadratic cost under finiteness assumptions. I.A.K. KUPKA (CANADA)	231

**IV - STABILITY, ROBUSTNESS AND SINGULAR PERTURBATIONS
TECHNIQUES****1 - STABILIZATION TECHNIQUES**

Stabilizability and asymptotic stabilizability of the angular velocity of a rigid body. D. AEYELS (BELGIUM)	243
Asymptotic properties of nonlinear minimum phase systems. C. BYRNES (U.S.A.), A. ISIDORI (ITALY)	254
Fraction representations and robust stabilization of nonlinear systems. J. HAMMER (U.S.A.)	265
Stabilization of nonlinear systems by means of linear feedbacks. A. ANDREINI, A. BACCIOTTI, P. BOIERI, G. STEFANI (ITALY)	281

2 - ROBUSTNESS AND SINGULAR PERTURBATIONS TECHNIQUES

A new approach to identification problems using singular perturbations. H.W. KNOBLOCH (GERMANY)	293
--	-----

VII

Generating series and singularly perturbed bilinear systems. F. ROTELLA, G. DAUPHIN-TANGUY (FRANCE)	305
From the robustness of stability degree in nature to the control of highly nonlinear manipulators. A. OUSTALOUP (FRANCE)	316
Affine realizations of multimodels : characterization, stability, identification. G. BORNARD, L-P. HU (FRANCE)	327

3 - ADAPTIVE TECHNIQUES

State estimation and adaptive control of multilinear compartmental systems : theoretical framework and application to (bio)chemical processes. G. BASTIN (BELGIUM)	341
Adaptive nonlinear control : an estimation-based algorithm. J. B. POMET, L. PRALY (FRANCE)	353
Adaptive linear control interpreted as nonlinear dynamical feedback for nonlinear systems. D. J. HILL, C. WEN (AUSTRALIA)	366

V - STOCHASTIC SYSTEMS

Approximation of a stochastic ergodic control problem. F. CAMPILLO, F. LE GLAND, E. PARDOUX (FRANCE)	379
Support theorems in nonlinear filtering. M. CHALEYAT-MAUREL, D. MICHEL (FRANCE)	396
Ergodicité des systèmes stochastiques polynomiaux en temps discret. A. MOKKADEM (FRANCE)	404
Generalized inputs to nonlinear systems. T. HUILLET, A. MONIN, G. MONTSENY, G. SALUT (FRANCE)	414
Bifurcation dynamique avec bruit multiplicatif. E. BENOIT, B.CANDELPERGHER, C. LOBRY (FRANCE)	429

VI - APPLICATIONS

1 - ROBOTICS

Remarks on some worked out applications of nonlinear control theory. J. LEVINE (FRANCE)	445
Putting physics back in control. J-J. E. SLOTINE (U.S.A.)	459
Feedback linearization of a one-link flexible robot arm modelled by partial differential-integral equations. T-J. TARN, X. DING, A. K. BEJCZY (U.S.A.)	474

2 - MISCELLANEOUS

Hybrid dynamical systems theory and nonlinear dynamical systems over finite fields. A. BENVENISTE, P. LE GUERNIC (FRANCE)	485
Automatique et régulation biologique. D. CLAUDE (FRANCE)	496
Internal model control of a steam generator with varying delays. S.AKSAS, D. MEIZEL (FRANCE)	508
Non-linear modeling and control of some classes of induction machine. G. A. CAPOLINO (FRANCE)	519
