

Contents

Applications of Combinatorial Optimization Bernhard Korte	1
Mathematical Programming Applications in National, Regional and Urban Planning Michael Florian	57
On Automatic Differentiation Andreas Griewank	83
Recent Developments and New Directions in Linear Programming Michael J. Todd	109
The Influences of Algorithmic and Hardware Developments on Computational Mathematical Programming John A. Tomlin	159
Geometry of Numbers and Integer Programming László Lovász	177
Linear and Nonlinear Optimization Problems with Submodular Constraints Satoru Fujishige	203
Sequential and Parallel Methods for Unconstrained Optimization Robert B. Schnabel	227
A Survey of Bundle Methods for Nondifferentiable Optimization Krzysztof C. Kiwiel	263
Fixed Point Algorithms for Stationary Point Problems Yoshitsugu Yamamoto	283
Stochastic Dynamic Optimization Approaches and Computation Pravin Varaiya and Roger J-B Wets	309
Optimization with Multiple Objectives Freerk Auke Lootsma	333
L. V. Kantorovich's Works in Mathematical Programming Joseph V. Romanovsky	365
