

Contents

<i>Contributors</i>	ix
<i>Participants</i>	xiii
<i>Preface</i>	xv
Lower Bounds for Partial Sums of Certain Positive Stationary Processes	1
<i>Jon Aaronson and Manfred Denker</i>	
Exact Sequences for Sums of Independent Random Variables	11
<i>André Adler</i>	
Unusual Applications of A. E. Convergence	31
<i>E. J. Balder</i>	
Filling Scheme Transformations of Coulomb Systems	55
<i>J. R. Baxter and R. V. Chacon</i>	
Harmonic Analysis and Ergodic Theory	73
<i>Alexandra Bellow, Roger L. Jones, and Joseph Rosenblatt</i>	
Almost Everywhere Convergence of Powers	99
<i>Alexandra Bellow, Roger L. Jones, and Joseph Rosenblatt</i>	
Independence Properties of Continuous Flows	121
<i>V. Bergelson</i>	
Moving Averages	131
<i>N. H. Bingham</i>	
Almost Sure Convergence in Ergodic Theory	145
<i>J. Bourgain</i>	

A Pointwise Ergodic Theorem for Positive, Cesaro-Bounded Operators on L_p ($1 < p < \infty$)	153
<i>Antoine Brunel</i>	
On the Number of Escapes of a Martingale and Its Geometrical Significance	159
<i>Donald L. Burkholder</i>	
Loss of Recurrence in Reinforced Random Walk	179
<i>Burgess Davis</i>	
On Pointwise Convergence in Random Walks	189
<i>Yves Derriennic and Michael Lin</i>	
Banach Spaces with the Analytic Radon-Nikodým Property and Compact Abelian Groups	195
<i>Gerald A. Edgar</i>	
Generalized Measure Preserving Transformations	215
<i>Ulrich Krengel</i>	
Tangent Sequences of Random Variables: Basic Inequalities and Their Applications	237
<i>S. Kwapien and W. A. Woyczynski</i>	
On a Pointwise Ergodic Theorem for Multiparameter Groups	267
<i>F. J. Martín-Reyes</i>	
The Two-Parameter Strong Law for Partially Exchangeable Arrays	281
<i>Terry R. McConnell and Eric Rieders</i>	
Multi-Parameter Weighted Ergodic Theorems from Their Single Parameter Version	297
<i>James H. Olsen</i>	
Weakly Ergodic Products of (Random) Non-Negative Matrices	305
<i>Steven Orey</i>	
The r-Quick Version of the Strong Law for Stationary ϕ-Mixing Sequences	335
<i>Magda Peligrad</i>	

Almost Everywhere Convergence of Some Nonhomogeneous Averages	349
<i>Karl Petersen</i>	
Simple Symmetric Random Walk in Z^d	369
<i>Pal Révész</i>	
Almost Superadditive Ergodic Theorems in the Multiparameter Case	393
<i>K. Schürger</i>	
On Convergence of Vector-Valued Mills Indexed by a Directed Set	405
<i>Zhen-Peng Wang and Xing-Hong Xue</i>
