List of contributors	xiii
<b>Survey paper 1</b>	
Simplified polynomial solution of the standard $\mathcal{H}_\infty$ optimal control problem <i>H. Kwakernaak</i>	1
Polynomial optimization <i>A. P. Roberts and M. M. Newmann</i>	23
A general transformation for polynomial systems <i>G. E. Hayton, A. B. Walker and A. C. Pugh</i>	35
Some local feedback results for linear systems <i>A. C. Pugh, A. Kafai and G. E. Hayton</i>	47
Stability analysis for discrete non-unit memory linear multipass processes <i>E. Rogers and D. H. Owens</i>	61
Total finite settling time stabilization for discrete-time single-input single-output systems <i>N. Karcanias and E. Milonidis</i>	71
Conditions for arbitrary pole assignability by input/output state-variable feedback <i>A. Chotai, C. Wang and P. C. Young</i>	87
Optimal pole placement control for discrete-time systems <i>K. Warwick</i>	97
Robust control design using eigenstructure assignment <i>S. K. Spurgeon and R. J. Patton</i>	107
A geometric approach on output feedback pole assignment <i>W. C. D. Ho</i>	121
<b>Survey paper 2</b>	
Invertibility of linear and nonlinear control systems: a survey <i>D. J. Bell</i>	131
On frequency response for nonlinear systems <i>S. P. Banks and B. Chanane</i>	147
Composite control of nonlinear singularly perturbed systems: a geometric approach <i>P. M. Sharkey and J. O'Reilly</i>	157
Asymptotic stabilization of a class of nonlinearly coupled uncertain dynamical systems <i>D. P. Goodall and E. P. Ryan</i>	167

Multivariable continuous self-adaptive control using variable structure control system design techniques <i>J. A. Burton and A. S. I. Zinober</i>	177
Asymptotic linearization of uncertain multivariable systems by sliding modes <i>G. Bartolini and T. Zolezzi</i>	191
Design of discrete-time 'adaptive' optimal variable structure controllers <i>A. Parvinmehr, A. J. Wilkinson and R. D. Greenough</i>	199
Robustness of direct adaptive control systems with slow sampling <i>P. A. Cook</i>	205
Multivariable reduced-variance pole-assignment self-tuners <i>M. B. Zarrop and R. Davies</i>	215
Predictive control with costed inputs <i>K. Warwick and D. H. Owens</i>	225
PID self-tuning control via optimal control methods <i>R. W. Jones and R. P. D. Baker</i>	235
Robustness of adaptive control systems <i>L. Wang and D. H. Owens</i>	247
Observer based design for robust stabilization of nonlinear systems <i>W. Dayawansa, G. Knowles and C. Martin</i>	257
Evaluation of robustness for systems with structured perturbations <i>G. Celentano, F. Garofalo and L. Glielmo</i>	267
A stability radius for time-varying linear systems <i>D. Hinrichsen, A. Ilchmann and A. J. Pritchard</i>	281
Parameterised stability domains and the robustness of integrodifferential systems <i>Stuart Townley</i>	291
On high-gain adaptive stabilization of infinite-dimensional systems with nonlinearities <i>Hartmut Logemann and David H. Owens</i>	303
 <b>Survey paper 3</b>	
Perturbation properties of a class of infinite-dimensional systems with unbounded control and observation <i>Jan Bontsema and Ruth F. Curtain</i>	319
The $L_2$ approximation of infinite-dimensional systems <i>Jonathan R. Partington</i>	347
Cost functionals for non-commensurate delay systems <i>J. E. Marshall, K. Walton and A. Barnes</i>	361
All-pass feed-back systems <i>P. E. Hydon, J. E. Marshall and K. Walton</i>	371

Multivariable controller design for an industrial distillation column <i>F. Allgöwer and J. Raisch</i>	381
Fuel optimal control of an automotive CVT powertrain <i>R. P. Jones</i>	407
Optimal shape design for differential inequalities <i>R. Butt and J. E. Rubio</i>	421
Some recent theoretical developments in process control and their relevance to industry <i>P. V. S. Ponnappalli, M. A. Johnson, M. J. Grimble, and D. H. Owens</i>	441
A general result on adaptive stabilization by switching function controllers <i>Bengt Mårtensson</i>	451
<b>Survey paper 4</b>	
Some aspects of the mathematical theory of evidence in multi-sensor data fusion <i>C. J. Harris</i>	461
