TABLE OF CONTENTS

Preface VII

To the memory of a great mathematician IX

1. Schroedinger operators : spectra, scattering and semiclassical behaviour

M.S.Birman, M.Z.Solomyak : *Negative discrete spectrum of the Schroedinger operator with large coupling constant : qualitative discussion* 3

M.S.Birman : *Discrete spectrum in the gaps of the continuous one in the large-coupling-constant limit* 17

A.V.Sobolev : *On the asymptotics of discrete spectrum for the Schroedinger operator in electric and homogeneous magnetic fields* 27

S.A.Vugalter, G.M.Zhislin : *Asymptotics of the discrete spectrum of Hamiltonians of quantum systems with a homogeneous magnetic field* 33

S.A.Vugalter : *Asymptotics of eigenvalues for many-particle Hamiltonians at symmetry subspaces* 55

V.Ivrii, A.Kachalkina : *Spectral asymptotics with highly accurate remainder estimates* 61

P.Exner : *Bound states and resonances in quantum wires* 65

V.S.Buslaev : *Spectral properties of the operators* $H\psi = -\psi_{xx} + p(x)\psi + v(\varepsilon x)$, *p is periodic* 85

S.V.Khryashchev : *Discrete spectrum for a periodic Schroedinger operator perturbed by a decreasing potential* 109

M.Novitskii : *On a complete description of the principal discrete series of spectral invariants of the Hill operator* 115

N.A.Chernyavskaya, L.A.Shuster : *WKB-approximations from the perturbation theory viewpoint* 119

H.Neidhardt : *Moving potentials and the completeness of wave operators. Part II : Propagating observables on scattering states* 125

Yu.A.Kuperin, Yu.B.Melnikov : *Representation of the three-body S-matrix in terms of effective amplitudes* 149

E.A.Yarevsky : *A three-body one-dimensional system with increasing interaction : wave function asymptotics* 155

B.N.Zakhariev, V.S.Olkhovsky, V.M.Shilov : *Surprises of quantum tunneling (something about the velocity of sub-barrier motion)* 159

2. Point and contact interactions, self-adjoint extensions

W.Kirsch, F.Nitzschner : *Lifshitz tails and non-Lifshitz tails for one-dimensional random point interactions* 171

S.A.Cheremshantsev, K.A.Makarov : *Point interactions with an internal structure as limits of nonlocal point interactions* 179

P.Stovicek : *Green's function for the Aharonov-Bohm effect with a non-Abelian gauge group* 183

I.Yu.Popov : *A model of zero-width slits and the real diffraction problem* 195

I.Yu.Popov : *Construction of an inelastic scatterer in nanoelectronics by the extension-theory methods* 197

J.F.Brasche, W.Karwowski : *On boundary theory for Schroedinger operators and stochastic processes* 199

J.Dittrich, P.Exner, P.Seba : *Dirac Hamiltonian with Coulomb potential and contact intraction on a sphere* 209

A.N.Kochubei : *Self-adjoint extensions of Schroedinger operators with singular potentials* 221

Yu.A.Kuperin, E.A.Yarevsky : *Currents and the extension theory* 229

3. Quantum chaos

P.Seba : *Chaotic quantum billiards* 237

F.M.Izrailev : *Relevance of the localization to quasi-energy statistics in quantum chaotic systems* 259

B.Milek, P.Seba : *Singular continuous quasi-energy spectrum in the kicked rotator with separable perturbation : onset of quantum chaos ?* 279

G.P.Berman, F.M.Izrailev : *Relation between correlation functions and spectrum statistics in the region of quantum chaos* 301

4. Other topics

P.B.Kurasov, B.S.Pavlov : *Localization effects in non-homogeneous dielectrics* 307

Yu.A.Kuperin : *A self-adjoint dilation of the linear Boltzmann operator* 315

G.A.Derfel : *Kato problem for functional-differential equations and difference Schroedinger operators* 319

S.I.Petrukhnovsky : *An existence theorem for some nonlinear nonlocal Schroedinger operators and the soliton-like dynamics for the corresponding dynamical systems* 323

V.N.Pivovarchik : *The Sturm-Liouville problem with a potential linear in spectral parameter* 327

M.A.Antonets, I.A.Shereshevsky : *Stochastic model of tree growth* 331

M.A.Antonets, I.A.Shereshevsky : *Critical phenomenon in the stationary model of random growth* 335

P.Bona : *On a quantum-classical connection, hidden symmetries and a model of Josephson junction* 339

V.R.Struleckaya : *Open multiquantum systems. Method of a generating functional* 343

Yu.V.Egorov : *Generalized functions and their applications* 347
