

1	Introduction <i>David Colton, Richard Ewing and William Rundell</i>
5	Approximation of Inverse Problems <i>Richard S. Falk</i>
15	Some "Complexity" Issues for Ill-Posed Problems <i>Thomas I. Seidman</i>
35	A Review of Multidimensional Inverse Potential Scattering <i>Margaret Cheney</i>
49	Use of Wiener-Hopf Factorization in the Schrödinger Inverse Scattering Problem in Three Dimensions <i>Roger G. Newton</i>
59	Numerical Methods in Inverse Acoustic Obstacle Scattering <i>Rainer Kress</i>
71	The Inverse Scattering Problem for Acoustic Waves in an Inhomogeneous Medium <i>David Colton and Peter Monk</i>
83	On the Scattering by Discontinuous Media <i>P. C. Sabatier</i>
99	The Dirichlet to Neumann Map and Applications <i>John Sylvester and Gunther Uhlmann</i>
139	Current Problems in Impedance Imaging <i>David Isaacson and Margaret Cheney</i>
149	Progress in Electrical Impedance Tomography <i>D. C. Barber and B. H. Brown</i>
163	Undetermined Coefficient Problems for Quasilinear Parabolic Equations <i>Michael S. Pilant and William Rundell</i>
185	Unknown Ingredient Inverse Problems and Trace-Type Functional Differential Equations <i>J. R. Cannon, Paul DuChateau and Ken Steube</i>
201	Some Inverse Problems for Elliptic and Parabolic Equations <i>Victor Isakov</i>
