

CONTENTS

Preface	vii
Participants	viii
Lectures on automorphic L -functions JAMES ARTHUR and STEPHEN GELBART	1
Gauss sums and local constants for $GL(N)$ COLIN J. BUSHNELL	61
L -functions and Galois modules PH. CASSOU-NOGUÈS, T. CHINBURG, A. FRÖHLICH, and M.J. TAYLOR (Notes by D. Burns and N.P. Byott)	75
Motivic p -adic L -functions JOHN COATES	141
The Beilinson conjectures CHRISTOPHER DENINGER and ANTHONY J. SCHOLL	173
Iwasawa theory for motives RALPH GREENBERG	211
Kolyvagin's work for modular elliptic curves BENEDICT GROSS	235
Index theory, potential theory, and the Riemann hypothesis SHAI HARAN	257
Katz p -adic L -functions, congruence modules and deformation of Galois representations H. HIDA and J. TILOUINE	271
Kolyvagin's work on Shafarevich-Tate groups WILLIAM G. MCCALLUM	295
Arithmetic of diagonal quartic surfaces I R.G.E. PINCH and H.P.F. SWINNERTON-DYER	317
On certain Artin L -Series DINAKAR RAMAKRISHNAN	339

The one-variable main conjecture for elliptic curves with complex multiplication	353
KARL RUBIN	
Remarks on special values of L -functions	373
ANTHONY J. SCHOLL
