CONTENTS

Foreword x

Preface xi

Macroscopic limits of kinetic equations 1
Claude Bardos, Francois Golse and David Levermore

The essence of particle simulation
of the Boltzmann equation 13
H. Babovsky and R. Illner

The approximation of weak solutions to
the 2-D Euler equations by vortex elements 23
J. Thomas Beale

Limit behavior of approximate solutions to conservation laws 38
Chen Gui-Qiang

Modeling two-phase flow of reactive
granular materials 58
Pedro F. Embid and Melvin R. Baer

Shocks associated with rotational modes 68
Heinrich Freistühler

Self-similar shock reflection in
two space dimensions 70
Harland M. Glaz

Nonlinear waves: overview and problems 89
James Glimm

The growth and interaction of bubbles
in Rayleigh-Taylor unstable interfaces 107
James Glimm, Xiao Lin Li, Ralph Menikoff,
David H. Sharp and Qiang Zhang

Front tracking, oil reservoirs, engineering scale
problems and mass conservation 123
James Glimm, Brent Lindquist and Qiang Zhang

Collisionless solutions to the four velocity
Broadwell equations 140
J.M. Greenberg and Cleve Moler

Anomalous reflection of a shock wave at
a fluid interface 156
John W. Grove and Ralph Menikoff

An application of connection matrix to
magnetohydrodynamic shock profiles 169
Harumi Hattori and Konstantin Mischaikow

Convection of discontinuities in solutions of the Navier-Stokes equations for compressible flow 173
David Hoff

Nonlinear geometrical optics 179
John K. Hunter

Geometric theory of shock waves 198
Tai-Ping Liu

An introduction to front tracking 203
Christian Klingenberg and Bradley Plohr

One perspective on open problems in multi-dimensional conservation laws 217
Andrew J. Majda

Stability of multi-dimensional weak shocks 239
Guy Métivier

Nonlinear stability in non-newtonian flows 251
J.A. Nohel, R.L. Pego and A.E. Tzavaras

A numerical study of shock wave refraction at a CO_2/CH_4 interface 261
Elbridge Gerry Puckett

An introduction to weakly nonlinear geometrical optics 281
Rodolfo R. Rosales

Numerical study of initiation and propagation of one-dimensional detonations 311
Victor Roytburd

Richness and the classification of quasilinear hyperbolic systems 315
Denis Serre

A case of singularity formation in vortex sheet motion studied by a spectrally accurate method 334
M.J. Shelley

The Goursat-Riemann problem for plane waves in isotropic elastic solids with velocity boundary conditions 367
T.C.T. Ting and Tankin Wang
