

Contents

| | | |
|--|--|-----|
| A.Ya. Belyankov: | | |
| Exhaustion method in numerical linear algebra | | 9 |
| O.P. Burdakov | | |
| Component-Wise quasi-Newton methods | | 17 |
| G. Gramlich, R. Hettich: | | |
| A software package for semi-infinite optimization | | 29 |
| A. Iskenderov: | | |
| Numerical solution and correctness of the definition of identification problem for nonlinear distributed system | | 41 |
| E. Kelevedzhiev, N. Kirov: | | |
| Interactive optimization software systems | | 55 |
| M.M. Mäkelä: | | |
| Bundle method for nonsmooth nonconvex constrained optimization | | 71 |
| V.A. Purtov, V.A.: | | |
| Fast convergent nonlinear programming methods | | 87 |
| C. Richter, B. Renner: | | |
| Efficient Methods for solving optimal control problems | | 99 |
| K. Schönefeld: | | |
| On the global convergence of an extended qp-free locally superlinearly convergent optimization method | | 111 |
| W. Schneiderheinze: | | |
| Numerically stable solution of linear least squares problems | | 127 |
