

CONTENTS

Evolving Application of Mathematical Optimisation in Design and Operation of Individual Signal-Controlled Road Junctions by R.E. Allsop	1
Ward Level Modelling of Cycling to Work by C. Ashley and C. Banister	25
Estimation of Trip Matrices from Traffic Counts: An Equilibrium Approach by J. Oh	35
Phase-Based Optimisation of Isolated Signal-Controlled Junctions: Sensitivity Analysis and a Treatment of Double Green Phases by J.P. Silcock	45
Sequencing of Traffic Signals by B.G. Heydecker	57
A Theoretical Model for the Permissive Right-Turn Capacity of Shared Lanes with an Opposed Flow at Traffic Signals by K. Brahimi and R. Ashworth	69
Multicriteria Signal Plan Choice at an Isolated Intersection by S. Reljić, M. Kamhi-Barna and S. Stojanović	81
Variability of Traffic Conditions at Junction Approaches in the Light of Non-Stationary Flow Demands by M. Tracz	95
SAM - A Stochastic Assignment Model by M.J. Maher	121
The SPI (Stepwise Path Increment) Algorithm Applied to Solve the Traffic Assignment Problem with Fixed Demand by Y. Arezki	133
Trees, Cycles and Sensitivity of the Traffic Assignment Problem by A. Sheer, N. Simhairi and L. Bennett	145
Equilibrium Traffic Assignment with Two Vehicle Types by M.J. Smith and T. van Vuren	159
Spatial Sampling Considerations Involved in Modelling Speeds on Rural Single Carriageway Roads in Scotland by A. Morrison and R. Hewitt	169
Traffic Behaviour at Diverges on Dual Carriageway Roads by J.G. Hunt and S.Y. Yousif	183

Computer Supported Planning of Aircraft Ground Handling Personnel by O. Babić, V. Tošić and D. Teodorović	197
The Gatwick Rapid Transit Systems by J.D. Griffiths, W. Holland and J.E. Williams	217
A Design Tool to Identify Those Elements of a Road Network Necessary to Support an Efficient Traffic Routeing Pattern by P. Wackrill	231
Road Planning in Rural Areas of Developing Countries by G.A. Makarachi and H.T. Tillotson	241
Vehicle Responsive Traffic Signal Control by M. Bell	253
Pelican Crossings - The Development of a Simulation Model to Evaluate Operating Strategies by J.G. Hunt and J.D. Griffiths	265
Surveying Traffic Delays at a Roundabout Near Plymouth by J. Dinwoodie	277
A Probabilistic Model for Estimating Travel Choice by H.S.L. Fan	287
Some Observations on the Impaired Operation of Buses in Central Urban Corridors by J.D. Nelson	297
The Quantifications of Passengers' Perceptions in Response to Bus Deregulation by W.T. Pullen	307
Crowding Levels and Fare Classes in Public Transport by D. Reyniers	319
Mathematical Programming Models for Conflict Minimization on Roads by G. Appa and C. Wright	329
Analysis of Partial Registration Plate Data using a Model with Poisson Input and Output by D.P. Watling and D.R. Grey	341
Pedal Cycle Accidents at T-Junctions by R.R. Henson	355
Accidents to Young Pedestrians: Circumstances, Consequences and Countermeasures by S.D. Lawson, M. Belcher, S. Proctor and P.J. Edwards	367

Some New Developments in Traffic Flow Theory and Practice by W. Leutzbach	375
The Dynamics of Large Complex Road Systems by J.H. Johnson	395
The Use of Stated Preference Techniques in the Quantitative Analysis of Travel Behaviour by D. Pearmain and J. Swanson	411
'Accident Migration' Following the Implementation of Highway Engineering Schemes by B. Fawaz and L. Mountain	421
Spatial Modelling of Road Accident Data by J. Loveday and D. Jarrett	433
A Method for Estimating Saturation Flows at Signal-Controlled Junctions by M. Tracz and A. Tarko	447
