

TABLE OF CONTENTS

INVITED CONFERENCE

Optimality conditions for utility maximization in an incomplete market I. Karatzas , J.P. Lehoczky, S.E. Shreve, Gan-Lin Xu	3
--	---

NUMERICAL ALGORITHMS

Nonlinear control of missiles through a geometric approach J.P. Harcaut	27
Non linear control of a batch evaporative crystallization using an algorithm of "L/A" type G. Fevotte, D. Canpont, M. Lakrori	37
Genetic breeding of non-linear optimal control strategies for broom balancing J.R. Koza, M.A. Keane	47
Process control using nonlinear programming techniques B. Wayne Bequette	57
Construction of autonomous boundary-value linear systems from acausal input-output functions R. Nikoukhah	67
PC-TACT : personal computer tool for advanced control techniques R.M.C. De Keyser	77
Solving singular regular systems $A_2X'' + A_1X' + A_0X = F(t)$ without increasing the dimension of the problem L. Jodar, E. Navarro	87
Matrix spectrum dichotomy and generalized Lyapunov matrix equation A. Ya. Bulgakov	95
Discrete approximation of the minimal time function for systems with regular optimal trajectories M. Bardi, M. Falcone	103
Analyse de l'algorithme multigrille FMGH de résolution d'équations d'Hamilton-Jacobi-Bellman M. Akian	113
A dynamic programming based gas pipeline optimizer H.S. Lall, P.B. Percell	123
Two effective approaches for hydroelectric generation scheduling Shi-Chung Chang, Weilin Yang, I-Kong Fong, Chun-Hung Chen	133

CONTROL OF DISTRIBUTED PARAMETER SYSTEMS

Iterative solution of a free-boundary problem arising in microscopic particle manipulation inside a liquid layer P.K.C. Wang, E. Behaegel, A.K. Runchal	145
Optimality conditions for elliptic variational inequalities Liu Wenbin, J.E. Rubio	154
Minimax shape optimization problem for Von Karman system A. Myslinski	164
Optimality conditions for a parabolic time delay system A. Kowalewski	174

LINEAR AND NONLINEAR FILTERING

A note about singular perturbations in the filtering of a Markov chain C. Marchetti	187
Filtres approchés pour un problème de filtrage non linéaire discret avec petit bruit d'observation P. Milheiro De Oliveira	198
Decentralized filtering for interconnected systems A. Feliachi	208
Split forms of z-domain algorithms for linear prediction and stability analysis A. Lepschy, G.A. Mian, U. Viaro	218
Time-discretization of the Zakai equation for diffusion processes observed in correlated noise P. Florchinger, F. Le Gland	228
Finite-dimensional stochastic filtering in discrete time : the role of convolution semigroups F. Spizzichino	238
On the decompositions of observations with non-Gaussian additive noise and their innovations processes Y. Takeuchi	248
Nonlinear filtering with dependent noises. The case of unbounded coefficients P. Florchinger	258

New algorithms of solving extremal problems R. Gabasov, F.M. Kirillova	570
Constrained controls in linear oscillating systems F.L. Chernousko	580
Fuel savings by optimal aircraft cruise with singular and chattering control G. Sachs, K. Lesch	590
Optimal path planning of manipulators with singular configurations, workspace and collision-free constraints D. Wang, D. Georges, Y. Hamam	600
On singular output tracking in multivariable nonlinear systems M.A. Fayaz, F. Lamnabhi-Lagarrigue	611

***CONTROLLABILITY AND STABILIZATION OF
DISTRIBUTED PARAMETER SYSTEMS***

Formal controllability and physical controllability of linear systems C. Lobry, P. Delfini	623
Conditions yielding weak controllability for a class of linear hereditary systems J.A. Reneke, A.K. Bose	632
Nonlinear exponential stabilization of Boussinesq equations Yuncheng You	642

STOCHASTIC AND ADAPTIVE CONTROL

Direct adaptive control in a state-space setting E.W. Kamen	655
Pole placement via generalized predictive control Y. Peng, R. Hanus	664
Separation principle in optimizing control of state-constrained dynamical systems under bounded uncertainty M.A. Brdys, B. Ulanicki	674
Unification of some MIMO adaptive control algorithms and global convergence analysis T.Y. Chai	684
Boundary control of a stochastic parabolic equation with nonsmooth final cost F. Flandoli	694

Approximation of Lyapunov exponents of stochastic differential systems on compact manifolds A. Grorud, D. Talay	704
Synthesis of closed-loop system controlling a random object W. Hejmo, P. Kulczycki	714
Maximum principle for stochastic optimal control with non convex control domain S. Peng	724

MULTIDECISION CONTROL AND GAMES

Nash vs Stackelberg strategies in a capital accumulation game J. Thépot	735
A two player dynamical game with imperfect information O. Pourtallier	745
An interactive multiple criteria decision supporting tool with application to a simplified regional development problem Cao Dong, M. Installé	755

CONTROL OF FINITE DIMENSIONAL SYSTEMS

CRONE control : principle synthesis, performances with non-linearities and robustness-input immunity dilemma A. Oustaloup	767
Vers une stabilisation non-linéaire discontinue M. Fliess, F. Messenger	778
A combinatorial approach of the nonlinear sampling problem S. Monaco, D. Normand-Cyrot	788
Non-linear MRAS in robots motion control B. Brogliato	798
Adaptive control of feedback equivalent systems J.B. Pomet, L. Praly	808

NONLINEAR ZERO DYNAMICS AND OUTPUT REGULATION

Viability kernels, controlled invariance and zero dynamics for nonlinear systems J.P. Aubin, C.I. Byrnes, A. Isidori	821
Output regulation of a flexible robot arm A. De Luca, L. Lanari, G. Ulivi	833
An analysis of regularity conditions in nonlinear synthesis M.D. Di Benedetto, J.W. Grizzle	843

Discontinuous predictive control, inversion and singularities. Application to a heat exchanger M. Fliess, P. Chantre, S. Abu El Ata, A. Coic	851
--	-----

The analysis of singularly perturbed zero dynamics A. Isidori, P.V. Kokotovic, S.S. Sastry, C.I. Byrnes,	861
---	-----

ROBUSTNESS

Elargissement des objectifs de robustesse des systèmes de commande D. Bensoussan	873
--	-----

Right half plane poles and zeros and robustness limitations in feedback systems M. Kinnaert	880
---	-----

Stabilizing control of a singularly perturbed system driven by wide-band noises M. El-Ansary	890
--	-----

Control of uncertain dynamical systems using strictly positive real systems M. Carvalho Minhoto Teixeira	900
--	-----

Parameter robust control design based on parametric identification quality M. Gauvrit, G. Gomes	912
---	-----

Rotation symmetric structure in control systems and related stability analysis Weilin Yang, Siying Zhang	924
--	-----

DISCRETE EVENTS SYSTEMS

A hydrodynamic limit for a lattice caricature of dynamic routing in circuit switched networks V. Anantharam	937
---	-----

Aggregation and multi-level control in discrete event dynamic systems C.M. Ozveren, A.S. Willsky	947
---	-----

An algebraic method for optimizing resources in timed event graphs S. Gaubert	957
--	-----

WIP and CSP-1 quality control in a two-stages queue like production C.S. Tapiero, G. Tsiotras	967
--	-----

Moduloïds and pseudomodules : 3 - the lattice structure problem E. Wagner	977
--	-----

Modelling and analysing a class of flexible manufacturing system L. Changyou	985
---	-----
