Contents

V. Peterka
Adaptation of LQG Control Design to Engineering Needs 1

K. J. Hunt, P. J. Gawthrop
Adaptation and Robustness 21

P. Ettler, F. Jirkovský
Digital Controllers for ŠKODA Rolling Mills 31

O. Kříž, R. Jiroušek
An Expert System as a Controller and its Closed Loop Behaviour 36

M. J. Grimble
H_∞ Robust Generalized Minimum Variance Self-tuning Controller 43

P. Kovanic
Gnostical Approach to Robust Control 61

P. C. Young, A. Chotai, W. Tych
True Digital Control: A Unified Design Procedure for Linear Sampled Data Control System 71

K. J. Hunt
Polynomial LQ Synthesis for Self-tuning Control 110

V. Kučera, J. Ježek, M. Krupička
Numerical Analysis of Diofantine Equations 128

V. Havlena
Simple Predictive LQ Controller Design 137

P. Nedoma
Toward Higher Software Effectiveness in the Field of Adaptive Control 149

G. W. Irwin
Novel Control Architectures 154

M. T. Tham, G. A. Montague, A. J. Morris
Process Estimation: Linear Adaptive Algorithms and Neural Networks 171

J. Böhm, R. Kulhavý
Towards More Credible Self-tuners... 189

I. Nagy, F. Dušek
Theory and Implementation of Paper Cross-profile
Adaptive Control 206

O. L. R. Jacobs
Case Studies in Application of Stochastic Control Theory 212

B. Rohál'-Il'kiv, P. Zelinka, R. Richter, I. Sroka, Z. Országhová
Design of a Multivariable Self-tuning Controller
for a Class of Distributed Parameter Systems 233

K. Warwick, B. Minbashian
Intelligent Parallel Control 258

J. Maršík, P. Klán, V. Görner
Signal-based Algorithms for Self-tuning Regulators
Easily Implementable on Single-board Microcomputers 277

K. Z. Karam
Self-tuning Control of Robot Manipulators 287

M. Kárný, A. Halousková
Preliminary Tuning of Self-tuners 305

V. Velička
Adaptive Control Algorithm for Time-variant Processes 323

J. Ježek
Algorithms for Conversion Between the Continuous-time Models
of Linear Systems and the Discrete-time Models 327
