

# TABLE OF CONTENTS

## MANAGEMENT SCIENCE AND ECONOMICS

<b>A Study of Manufacturer-Retailer Marketing Strategies: A Differential Game Approach</b>	1
P. Chintagunta, Cornell University D. Jain, Northwestern University	
<b>The Feedback Stackelberg Equilibrium in the Cartel-Versus-Fringe Model</b>	11
F. Groot, Tilburg University	
<b>A Stackelberg-Nash Model for the Design of Deregulated Transit System</b>	21
P. Marcotte, Collège Militaire Royal de St-Jean M. Blain, Université de Montréal	
<b>A Game Theoretical Approach to Public Investment Versus Private Investment</b>	29
D. Yeung, University of Hong Kong and University of Windsor	
<b>Entry with New Multiproduct Technologies</b>	39
L.-H. Röller, M.M. Tombak European Institute of Business Administration	

## INCENTIVES AND COORDINATION

<b>Distributed Hierarchical Team Resource Allocation</b>	48
X. Miao, P.B. Luh, D.L. Kleinman University of Connecticut	
<b>Incentive Strategies in an Inter-Firm Coordination Arrangement</b>	58
M.A. Pérez, Universidad Católica de Chile and AT&T Bell Laboratories	
<b>Strategic Bargaining and Difference Games</b>	68
H. Houba, Tilburg University A. de Zeeuw, Tilburg University and Free University	
<b>Game-Theoretic Modelling in the Dynamic Pricing of Electricity</b>	78
J. Ruusunen, R.P. Hämmäläinen, M. Räsänen Helsinki University of Technology	

<b>On Intertemporal Cooperation - A Dynamic Stochastic Problem with Nonadditive Group Utility Function</b>	88
H. Ehtamo, J. Ruusonen, R.P. Hämäläinen Helsinki University of Technology	
 <b>RESOURCE MANAGEMENT AND ENVIRONMENT</b>	
<b>Differential Games and the Optimal Management of Transboundary Fisheries</b>	95
G.R. Munro, University of British Columbia	
<b>Economic Planning and Uncertainty in Renewable Resources</b>	102
L. Salchenberger, Loyola University of Chicago S. Stefani, University of Brescia	
<b>Pollution Vs. Nature - Differential Game Models</b>	112
M. Schäfer, Universität der Bundeswehr, Hamburg	
<b>A Nonzero-Sum Game with Variable Final Time</b>	122
M.B. Klompstra, Delft University of Technology	
<b>Environment Problem as a Common-Property Resource Game</b>	132
S. Clemhout, H. Wan, Jr. Cornell University	
<b>The Environmental-Economic Planning Model with the Dynamic Stackelberg Game</b>	155
N. Koyama, Nagoya City University, Japan	
<b>Heterogeneous Discount Rates: A Generalization of Hotelling's Rule</b>	163
A.G. Malliaris, Loyola University of Chicago S. Stefani, University of Brescia	
<b>Investment, Harvest, and Taxation Strategies of the Forest Sector: A Differential Game Approach with a Computational Decision-Aid</b>	170
H. Kivijärvi, M. Soismaa Helsinki School of Economics	
<b>Transboundary Air Pollution between Finland and the USSR: A Dynamic Acid Rain Game</b>	183
V. Kaitala, Helsinki University of Technology M. Pohjola, Research Institute of the Finnish Economy O. Tahvonon, Helsinki School of Economics	

## HIERARCHICAL MODELS AND COMPUTATION

<b>The Derivation of Feedback Stackelberg Equilibria in Dynamic Economic Games</b> R. Gradus, Tilburg University	193
<b>Dynamic Game Strategies for Corporate Demand Models in National Economy</b> Y. Ito, Meijo University, Nagoya	204
<b>Hierarchical Dynamic Planned-Economy Models with Central Government Coordination of One-Step Delay Information</b> B.-B. Li, J.-Z. Wu Shanghai Jiao-Tong University	213
<b>Non-Cooperative Equilibrium Solutions for a Stochastic Dynamic Game of Economic Stabilization Policies</b> R. Neck, Wirtschaftsuniversität Wien	221
<b>Dynamic Hierarchical N-Person Games Theory with Coalitions</b> A.F. Kononenko, B.P. Krutov, Y.E. Chistiakov Computing Center of the USSR Academy of Sciences, Moscow	231
<b>Approaching Core Solutions by Means of Continuous Bargaining</b> S.D. Flåm, University of Bergen	239
<b>Optimal Portfolio Selection as a Bargaining Game</b> A. Bassetti, C. Torricelli University of Modena	249
<b>A Note on the Dynamic Risk Sensitive Nash Games</b> W. Krajewski, Systems Research Institute, Polish Acad. Sci	260
<b>Equilibrium Points in Constrained Minimization and Games</b> F. Mignanego, Università di Genova G. Picri, Università di Sassari	269
<b>A Cooperative Game Governed by a Differential Inclusion</b> M.S. Radjef, University of Bejaia	276
<b>Regulation of Linear Quadratic Games</b> P. Caravani, University of Aquila	283
<b>The Time Consistency of the Optimality Principles in Non-Zero Sum Differential Games</b> L.A. Petrosjan, University of Leningrad	299
