

TABLE OF CONTENTS

INVITED LECTURES

Some PDE and Statistical Problems from the VLSI Industry E. CUMBERBATCH	3
Reflector Design as an Inverse Problem H. W. ENGL, A. NEUBAUER	13
Wavelets and Applications S. JAFFARD	25
Estimation of Directional Spectra of Ocean Waves H. E. KROGSTAD	35
Optimal Shape Design P. NEITTAANMÄKI	45
Random Functions in Physical and Mechanical Systems J. VOM SCHEIDT	55
Mathematical Models in Chemical Engineering HJ. WACKER, T. KRONBERGER, A. ORTNER, L. PEER	65

Mini-symposium:

OPTIMAL SUPPLY AND DISTRIBUTION OF ENERGY

Use of Pattern Recognition in Electricity Load Forecasting J. BANIM, P. F. HODNETT	77
Overview of Optimal Operations Planning at the Swedish State Power Board H. BRÄNNLUND, D. SJELVGREN	83
Approximate Solution of a System of Reservoir Power Plants by Variational Techniques A. GANGL, J. GUTENBERGER, HJ. WACKER	89
Decomposition Method with Superlinear Convergence for Power Plant Systems J. GUTENBERGER, A. GANGL, HJ. WACKER	95
An Electricity Load Forecasting System O. HYDE, P. F. HODNETT	99
Daily Load Prediction via Cluster Analysis and Learning Machines E. H. LINDNER	105
The Optimal Scheduling of Hydro-Electric Power Generation P. OLIVEIRA, S. MCKEE, C. COLES	109
Greedy Algorithm for Maintenance Scheduling in Electric Power System Zs. SOÓS, L. VARGA	115

CONTRIBUTED PAPERS

Analytical and Computer Design of Spiroid Gears V. ABADJIEV, D. PETROVA	121
Testing the Ease of Learning of Industrial Systems B. S. ACAR	127
Mathematical Modelling of Two-Phase Flow in Boilers C. J. ALDRIDGE	131
Stationary Pipe Flow of Power-Law Fluids G. ARONSSON	135
Dynamic Simulation of Plate Distillation Columns HJ. BART, T. KRONBERGER, L. PEER, HJ. WACKER	139
Outgassing and Mass Exchange Between Two Surfaces A. BELLENI-MORANTE, A. FASANO, M. PRIMICERIO	143
Numerical Simulation of Dynamic Sales Response Models M. BLOSS, R. H. W. HOPPE	147
Tubes J. J. A. M. BRANDS	151
A Linear Programming Approach for Scheduling an S.M.T. Assembly Line E. BREMBILLA, G. POLI	155
Nonlinear Analysis of a Compressor with Active Stabilization M. BRØNS, P. GROSS	161
A Time-Dependent Model for the Space-Charge Distribution in Solid Dielectrics Under High Electric Field C. BUDD, R. HARE	167
Catalytic Converters and Porous Medium Combustion H. BYRNE	177
Uncertainty Quantification of Structural Response by Higher Moments Analysis C. CARINO	181
Reliability of Time-Series Forecasts D. ČEPAR, B. MOTNIKAR	185
ARMA Models of Time Series with Missing Data D. ČEPAR, Z. RADALJ	189
Nonlinear Oscillations of Miniature Synchronous Motors W. D. COLLINS	193
Wavelet Method for the Stefan Problem E. CORTINA, S. GOMES	197
Working Group Header: Thrust Bearing A. J. DAMSLORA, J. P. M. LAUMEN	201
Self-validating Numerics for Industrial Problems H.-J. DOBNER, W. KLEIN	205

Topological Algorithms in Picture Processing U. ECKHARDT, G. MADERLECHNER	209
Field Applicators for Magnetic Resonance G. J. EHNHOLM, S. VAHASALO	213
Case Studies for a Single Cylinder Combustion Engine G. ENGL, P. RENTROP	217
A Slow Flow Problem Arising in Continuous Electrode Smelting A. D. FITT	223
Numerical Problems of a Convection-Diffusion Equation with Arrhenius Source Term R. J. GATHMANN, F. K. HEBEKER	229
Silicon Technology Development and Optimization by Integrated Process, Device and Circuit Simulation System SATURN A. GILG	235
Novel Algorithms for the Computation of Complex Chemical Equilibria and Applications H. GREINER	239
Numerical Simulation of a Countercurrent Heat Exchanger by Piecewise Linearization G. HENDORFER, L. PEER, W. STÖGER, HJ. WACKER	243
The Mathematical Modelling of Two-Phase Fire-Sprinkler Interaction N. A. HOFFMANN, E. R. GALEA	249
Modelling the Hardenability of Steel by Using the Generalized Linear Hypothesis K. HUHTALA	255
A Numerical Investigation of an Elastic Strip in Free Rolling without Slip M. J. JAFFAR	259
Formation of Oscillation Marks on Continuously Cast Steel J. R. KING, A. A. LACEY, C. P. PLEASE, P. WILMOTT	267
Techniques for Finite Element Analysis of Magnetostatic and Eddy Current Problems J. LUOMI	271
Finite Element Thermal Analysis of Closely Spaced Underground Power Cables K. G. MAHMOUD, S. ABDEL-SATTAR	277
Heat Propagation by Hot Gas Flow Through a Pebble Bed J. T. MARTI	283
Thermal Effects During Cementation of an Endomedullary Infibulum S. MAZZULLO, G. PAGANETTO, T. SIMONAZZI	287
A Linear Mixed-Integer Programming Model for the Optimization Logical of the Modules Burn-in Test A. MERLI, G. POLI	293
The Spectrum of an Inhomogeneous Membrane J. MOLENAAR	297
Nonsmooth Optimization with Industrial Applications M. M. MÄKELÄ, T. MÄNNIKKÖ	303

Computer Aided Design of Grounding Grids: A Boundary Element Approach F. NAVARRINA, L. MORENO, E. BENDITO, A. ENCINAS, A. LEDESMA, M. CASTELEIRO	307
Heat Transfer from the Coolant Tubes of a Power Condenser A. A. NICOL, G. WILKS	315
Numerical Predictions of Circulating Fluidised Beds with Mono- and Multi-Sized Particles M. K. PATEL, K. PERICLEOUS, M. CROSS	319
Computation of Magnetic Fields in Electric Machinery Using a Coupled Finite Element-Network Element Model D. PHILIPS, L. DUPRÉ, R. VAN KEER	325
Adaptive Speed Synchronization of Segmented Conveyor Belts D. PRÄTZEL-WOLTERS, S. SCHMID	331
Eddy Current Computation M. REISSEL, J. WICK	335
The Coupling of Acoustical Membrane and Cavity Vibrations S. W. RIENSTRA	339
Implementation Aspects of Using Nonlinear Filtering for the Failure Detection Problem T. RUOKONEN	345
Expected Time to Failure of Some General Reliability Systems L. RÅDE	349
Application of Model Predictive Adaptive Consistency Control in TMP-Mill K. SAARINEN	355
Shape Design for Magnetic Shielding J. SARVAS, G. EHNHOLM	361
Mathematical Continuing Education - A New Task for University M. SCHULZ-REESE	367
Computer-Aided Quality Control of the Tape Recorder Recording-Reproducing Channel V. ŠIMONYTĚ, V. SLIVINSKAS	371
Application of Neimark's Criterion to a Stability Problem for the Flow Through a Collapsible Tube K. M. SOBCZYK, J. W. REYN	375
Marangoni Convection in a Weld Pool M. VYNNYCKY	381
Solution of Free Boundary Problems in Mould Filling W. WEINELT, K.-H. HARTWIG, H. LIEBERMANN, J. STEINBACH	387
Multi-Fibre Extrusion - A Nonlinear Integral Equation P. WILMOTT	393
Modelling the Thermistor A. S. WOOD	397
