

## Table of Contents

|   |     |
|---|-----|
| <b>A. Adem,</b><br>On the geometry and cohomology of finite simple groups .....   | 1   |
| <b>D.J. Benson,</b><br>Resolutions and Poincaré duality for finite groups .....   | 10  |
| <b>A.J. Berrick and C. Casacuberta,</b><br>Groups and spaces with all localizations trivial .....                             | 20  |
| <b>I. Bokor and I. Llerena,</b><br>More examples of non-cancellation in homotopy .....  | 30  |
| <b>C. Broto and S. Zarati,</b><br>On sub- $\mathcal{A}_p^*$ -algebras of $H^*V$ .....   | 35  |
| <b>A. Cavicchioli and F. Spaggiari,</b><br>The classification of 3-manifolds with spines related to<br>Fibonacci groups ..... | 50  |
| <b>B. Cenkli and R. Porter,</b><br>Algorithm for the computation of the cohomology of<br>$\mathcal{J}$ -groups .....          | 79  |
| <b>F.R. Cohen,</b><br>Remarks on the homotopy theory associated to perfect groups .....                                       | 95  |
| <b>E. Dror Farjoun,</b><br>Homotopy localization and $v_1$ -periodic spaces .....   | 104 |
| <b>N.V. Dung,</b><br>The modulo 2 cohomology algebra of the wreath<br>product $\sum_{\infty} f X$ .....                       | 115 |
| <b>J.C. Harris and R.J. Shank,</b><br>Lanne's division functors on summands of $H^*(B(Z/p)^r)$ .....                          | 120 |
| <b>C. Hayat-Legendre,</b><br>Classes homotopiques associées à une $G$ -opération .....  | 134 |
| <b>F. Hegenbarth,</b><br>A note on the Brauer lift map .....  | 139 |

|  |     |
|--|-----|
| <b>L.J. Hernández and T. Porter,</b><br>Categorical models of $n$ -types for pro-crossed complexes<br>and $\mathcal{J}_n$ -spaces .....              | 146 |
| <b>M.J. Hopkins, N.J. Kuhn and D.C. Ravenel,</b><br>Morava $K$ -theories of classifying spaces and generalized<br>characters for finite groups ..... | 186 |
| <b>K. Ishiguro,</b><br>Classifying spaces of compact simple lie groups<br>and $p$ -tori .....  | 210 |
| <b>M. Izydorek and S. Rybicki,</b><br>On parametrized Borsuk-Ulam theorem for free $Z_p$ -action .....   | 227 |
| <b>A. Jeanneret and U. Suter,</b><br>Réalisation topologique de certaines algèbres associées<br>aux algèbres de Dickson .....                        | 235 |
| <b>L. Lomonaco,</b><br>Normalized operations in cohomology .....   | 240 |
| <b>A.T. Lundell,</b><br>Concise tables of James numbers and some homotopy of<br>classical lie groups and associated homogeneous spaces .....         | 250 |
| <b>J.R. Martino,</b><br>An example of a stable splitting: the classifying space of<br>the 4-dim unipotent group .....                                | 273 |
| <b>J.E. McClure and L. Smith,</b><br>On the homotopy uniqueness of $BU(2)$ at the prime 2 .....  | 282 |
| <b>C.A. McGibbon and J.M. Møller,</b><br>On infinite dimensional spaces that are rationally<br>equivalent to a bouquet of spheres .....              | 285 |
| <b>G. Mislin,</b><br>Cohomologically central elements and fusion in groups .....   | 294 |
| <b>D. Notbohm and L. Smith,</b><br>Rational homotopy of the space of homotopy equivalences<br>of a flag manifold .....                               | 301 |
| <b>M. Raussen,</b><br>Rational cohomology and homotopy of spaces with<br>circle action .....   | 313 |
| <b>C. Shengmin and S. Xinyao,</b><br>On the action of Steenrod powers on polynomial algebras .....   | 326 |
