

# Simulation and Optimization:

## Proceedings of the International Workshop on Computationally Intensive Methods in Simulation and Optimization

### Contents

Foreword ( <i>A. Kurzhanski</i> ) .....	VII
Preface ( <i>U. Dieter/ G. Pflug</i> ) .....	IX

### Part I: Optimization of Simulated Systems

Performance evaluation for the score function method in sensitivity analysis and stochastic optimization <i>S. Asmussen and R. Rubinstein</i> .....	1
Experimental results for gradient estimation and optimization of a markov chain in steady-state <i>P. l'Ecuyer and N. Giroux and P.W. Glynn</i> .....	14
Optimization of stochastic discrete event dynamic systems <i>A. Gaivoronski</i> .....	24
Sensitivity analysis of simulation experiments: Regression analysis and statistical design. <i>J.P.C. Kleijnen</i> .....	45

## Part II: Optimization and Stochastic Optimization

A stochastic optimization approach for training the parameters in neural networks <i>N. Baba</i> .....	55
Integrated stochastic approximation program system <i>P. Charamza</i> .....	80
Lexicographic duality in linear optimization <i>I.I. Eremin</i> .....	101
Dual optimization of dynamic systems <i>R. Gabasov and F. Kirillova</i> .....	109
Stochastic approximation via averaging: The Polyak's approach revisited. <i>G. Yin</i> .....	119

## Part III: Random Numbers

Nonuniform random numbers: A sensitivity analysis for transformation methods <i>L. Afflerbach and W. Hörmann</i> .....	135
Nonlinear methods for pseudorandom number and vector generation <i>H. Niederreiter</i> .....	145
Sampling from discrete and continuous distributions with c-rand <i>E. Stadlober and R. Kremer</i> .....	154
