

## CONTENTS

G.ALEXOPOULOS, Parabolic Harnack inequalities and Riesz transforms on Lie groups of polynomial growth .....	1
H.ARAI, Harmonic analysis with respect to degenerate Laplacian on strictly pseudoconvex domains .....	15
J.M.ASH and R.BROWN, Uniqueness and nonuniqueness for harmonic functions with zero nontangential limits .....	30
A.CARBERRY, E.HERNÁNDEZ and F.SORIA, Estimates for the Keakeya maximal operator on radial functions in $\mathbf{R}^n$ .....	41
S.-Y.A.CHANG and P.C.YANG, Spectral invariants of conformal metrics .....	51
M.CHRIST, Remarks on the breakdown of analyticity for $\bar{\partial}_b$ and Szegő kernels .....	61
R.COIFMAN and S.SEMMES, $L^2$ estimates in nonlinear Fourier analysis .....	79
DINH DUNG, On optimal recovery of multivariate periodic functions .....	96
S.A.A.EMARA, A class of weighted inequalities .....	106
G.I.GAUDRY, Some singular integrals on the affine group .....	117
J.-P.KAHANE, From Riesz products to random sets .....	125
T.KAWAZOE, A model of reduction in harmonic analysis on real rank 1 semisimple Lie groups I .....	140
P.-G.LEMARIÉ, Wavelets, spline interpolation and Lie groups .....	154
P.MATTLA, Principle values of Cauchy integrals, rectifiable measures and sets ...	165
A.MIYACHI, Extension theorems for real variable Hardy and Hardy-Sobolev spaces .....	170
T.MIZUHARA, Boundedness of some classical operators on generalized Morrey spaces .....	183
G.SINNAMON, Interpolation of spaces defined by the level function .....	190
TH.N.VAROPOULOS, Groups of superpolynomial growth .....	194
J.M.WILSON, Littlewood-Paley theory in one and two parameters .....	201
J.M.WILSON, Two-weight norm inequalities for the Fourier transform .....	207
Program .....	211
List of participants .....	213
