Contents

Preface v

From Knots to Quantum Groups and Back 1
L. H. Kauffman

Non-Commuting Coordinates and Differential Operators 33
A. Sudbery

Differential Calculus for the N-Dimensional Quantum Plane 53
J. Schwenk

Quantum Deformations 62
C. K. Zachos

Deformations, Coproducts, and U 72
T. L. Curtright

Exotic Solutions of Yang-Baxter Equation and the Quantum Group Structure 97
M.-L. Ge and K. Xue

On a Trace of Q-Analog Vertex Operators 113
N. H. Jing

Quantum Groups and Basic Hypergeometric Functions 123
L. C. Biedenharn and M. A. Lohe

Polynomial Algebras with q-Heisenberg Operators 133
D. B. Fairlie

The Moyal Bracket 143
P. Fletcher

The Two Anyon System and the q-Oscillator 158
E. G. Floratos

Q-mutators and Violations of Statistics 166
O. W. Greenberg

Quantum Groups in WZW and Chern-Simons Theories 181
G. Siopsis

Aspects of q-Virasoro Algebra 194
A. P. Polychronakos

Integrable Higher-Spin Chains with $SU_q(2)$ Symmetry 206
L. Mezincescu and R. I. Nepomechie

$SU(2)_q$ and $SU(2)$ as Hamiltonian Symmetries 236
D. G. Caldi

Taming the Integrable Zoo 247
A. LeClair

Toda Theories, W-Algebras, and Their Braiding and Fusion Properties 258
A. Bilal

Aspects of Affine Toda Field Theory 275
H. W. Braden, E. Corrigan, P. E. Dorey, and R. Sasaki

Thermodynamic Bethe Ansatz, Sine-Gordon Theory, and Minimal Models 306
H. Itoyama and P. Moxhay

Towards a Theory of W_3 Gravity 321
K. Schoutens, A. Sevrin, and P. van Nieuwenhuizen

Workshop Participants 335
