

## TABLE DES MATIERES

### Mark I. FREIDLIN : "SEMI-LINEAR PDE'S AND LIMIT THEOREMS FOR LARGE DEVIATIONS"

Introduction	1
1. Markov processes and differential equations	5
2. Generalized KPP-equations and large deviations	14
3. Generalized KPP-equations under condition (N)	21
4. Examples	28
5. General result	37
6. Models of evolution	45
7. Some remarks and generalizations	57
8. Weakly coupled reaction-diffusion equations	63
9. RDE-systems of KPP type	82
10. Random perturbations of RDE's. Perturbed boundary conditions	89
11. Random perturbations of RDE's. White noise in the equations.	100
References	107
Subject Index	109

### Jean-François LE GALL : "SOME PROPERTIES OF PLANAR BROWNIAN MOTION"

1. Introduction	115
2. Basic properties of planar Brownian motion	120
3. Two-sided cone points and the convex hull of planar Brownian motion	132
4. One-sided cone points and a two dimensional version of Levy's theorem on the Brownian supremum process	141
5. Burdzy's theorem on twist points	154
6. Asymptotics for the Wiener sausage	160
7. Connected components of the complement of a planar Brownian path	171
8. Intersection local times and first applications	181
9. Points of infinite multiplicity of the planar Brownian motion	197
10. Renormalization for the powers of the occupation field of a planar Brownian motion	205
11. Asymptotic expansions for the area of the planar Wiener sausage	219
References	230
Subject index	235
