

## Contents

(Asterisk indicates the author who presented the paper at the symposium.)

Preface	xiii
Numerical Tests of 3-D Vortex Methods Using a Vortex Ring with Swirl	
J. T. BEALE*, A. EYDELAND, AND B. TURKINGTON	1
Winding and Reconnection Mechanisms of Closely Interacting Vortex Tubes in Three Dimensions	
O. N. BORATAV, R. B. PELZ, AND N. J. ZABUSKY*	11
Does Axial Strain Enhance Vortex Cancellation?	
J. D. BUNTINE* AND D. I. PULLIN	45
Fast Vortex Methods in Three Dimensions	
T. F. BUTTKE*	51
Analysis for the Evolution of Vortex Sheets	
R. E. CAFLISCH*	67
Statistical Mechanics and Vortex Motion	
A. J. CHORIN*	85
Particle-grid Domain Decomposition Methods for the Navier–Stokes Equations in Exterior Domains	
G.-H. COTTET*	100
Vortices in Quasiperiodic Taylor–Couette Flows	
K. T. COUGHLIN AND P. S. MARCUS*	119
Numerical Simulation of Axisymmetric Vortex Breakdown in a Closed Cylinder	
O. DAUBE*	131
Vortex Schemes for Viscous Flow	
D. FISHELOV*	153
The Development and Application of the Transport Element Method to Three Dimensional Reacting Shear Layers	
A. F. GHONIEM* AND O. M. KNIO	165

Finite Element Methods for the Numerical Simulation of Incompressible Viscous Flow. Introduction to the Control of the Navier–Stokes Equations R. GLOWINSKI*	219
On Smallest Scale Estimates and a Comparison of the Vortex Method to the Pseudo-spectral Method W. D. HENSHAW*, H.-O. KREISS, AND L. G. REYNA	303
A Survey on Convergence Analysis for Point Vortex Methods T. Y. HOU*	327
Exact Desingularization and Local Regridding for Vortex Methods T. Y. HOU, J. LOWENGRUB*, AND M. J. SHELLEY	341
Convergence of a Finite Difference Method Using Vorticity Boundary Conditions T. Y. HOU AND B. T. R. WETTON*	363
Numerical Simulation of Incompressible Viscous Flows by Means of Particle Methods S. HUBERSON*, A. JOLLÈS, AND W. SHEN	369
Vortex Sheet Computations: Roll-up, Wakes, Separation R. KRASNY*	385
Three-dimensional Vorticity Dynamics in the Near Field of Co-flowing Forced Jets J. C. LASHERAS*, A. LECUONA, AND P. RODRIGUEZ	403
Smooth Grid Methods for the Vorticity Formulation of the Euler Equations J. LOWENGRUB AND M. J. SHELLEY*	423
Deterministic Particle Method: Diffusion and Boundary Conditions S. MAS-GALLIC*	433
Three-dimensional Vorticity Dynamics in Jets E. MEIBURG* AND J. E. MARTIN	467
Particle Approximation B. MERRIMAN*	481
Characteristic-Galerkin and the Particle Method for the Convection- Diffusion Equation and the Navier–Stokes Equations O. PIRONNEAU* AND S. HUBERSON	547
The Random Vortex Method with Vorticity Creation: Introduction and Guide to Parameter Selection E. G. PUCKETT*	567

<b>A Lagrangian Vortex Method for the Incompressible Navier–Stokes Equations</b> G. Russo*	585
<b>Vortex Methods and Massively Parallel Processors</b> J. A. SETHIAN*, J.-P. BRUNET, A. GREENBERG, AND J. P. MESIROV	597
<b>A Dynamical Systems Analysis of Kinematics in the Time-periodic Wake of a Circular Cylinder</b> K. SHARIFF*, T. H. PULLIAM, AND J. M. OTTINO	613
<b>Vortex Reconnection and Smoothness of the Euler Equations</b> M. J. SHELLEY* AND D. I. MEIRON	647
<b>Interaction of Vortices with a Free Surface and Density Interfaces</b> G. TRYGGVASON*, S. O. UNVERDI, M. SONG, AND J. ABDOLLAHI-ALIBEIK	679
<b>Lagrangian Description of Unsteady Separation</b> L. L. VAN DOMMELEN*	701
<b>2-D and 3-D Aspects of the Wake of a Cylinder, and their Relation to Wake Computations</b> C. H. K. WILLIAMSON*	719
