In Memoriam	iii
Preface	v
Contributors	xi
PART I. GEOMETRIC METHODS IN NONLINEAR ELLIPTIC PARTIAL DIFFERENTIAL EQUATIONS AND APPLIED PROBLEMS	
1. Geometric Inequalities and Estimates of Solutions for Nonlinear Euler–Lagrange Equations and Applied Problems <i>Ilya J. Bakelman and William L. Perry</i>	3
2. Qualitative Behavior of Solutions to a System of Partial Differential Equations from Nonlinear Elasticity <i>Patricia Bauman</i>	53
	vii

3.	Asymptotic Approximations to the Fundamental Solutions of Differential Equations on Manifolds <i>S. A. Fulling</i>	69
4.	Harmonic Maps with Nontrivial Higher-Dimensional Singularities <i>Guojun Liao and Nathan Smale</i>	79
5.	Elliptic Systems for a Medium with Microstructure <i>R. E. Showalter and N. J. Walkington</i>	91
6.	Asymptotic Behavior of Positive Decreasing Solutions of $y'' = F(t, y, y')$ <i>Steven D. Taliaferro</i>	105
7.	Uniqueness of Capillary Surfaces in Wedges and Cones <i>Thomas I. Vogel</i>	129
8.	A Neumann Evolution Problem for Plastic Antiplanar Shear <i>Xiaodong Zhou</i>	139
PART II. CONVEX BODIES AND RELATED TOPICS		
9.	Axiomatic Convex Potential Theory <i>E. M. J. Bertin</i>	149
10.	Area-Reducing Flows <i>Xiaoxi Cheng</i>	181
11.	Double Normals Characterize Bodies of Constant Width in Riemannian Manifolds <i>Boris V. Dekster</i>	187
12.	Quasi-time Functions in Lorentzian Geometry <i>Paul E. Ehrlich and Gérard G. Emch</i>	203
13.	The Weyl Problem for Surfaces of Nonnegative Curvature <i>Joseph A. Iaia</i>	213
14.	Singularities and the Conformal Scalar Curvature Equation <i>Robert C. McOwen</i>	221

PART III. SURVEYS DEVOTED TO GEOMETRIC INEQUALITIES AND CONVEX BODIES	
15. Geometric Inequalities and Existence Theorems for Convex Generalized Solutions of n -Dimensional Monge–Ampère Equations <i>Ilya J. Bakelman</i>	237
16. The Isoperimetric Problem for Two-Dimensional Convex Surfaces <i>Ilya J. Bakelman and Steven D. Taliaferro</i>	289
PART IV. PROBLEMS	
17. Open Problems in the Geometry of Equilibrium Configurations <i>Robert Gulliver and Henry Wente</i>	307
