CONTENTS

Preface vii

Contributors viii

1. Survey Articles:

B. Fischer	Clifford-Matrices	1
B. Huppert	Research in Representation Theory at Mainz (1984-1990)	17
K. Lux, H. Pahlings	Computational Aspects of Representation Theory	37
B.H. Matzat	Der Kenntnisstand in der konstruktiven Galoisschen Theorie	65
G.O. Michler	Contributions to Modular Representation Theory of Finite Groups	99
C.M. Ringel	Recent Advances in the Representation Theory of Finite Dimensional Algebras	141
K.W. Roggenkamp	The isomorphism problem for integral group rings of finite groups	193

2. Research Articles:

M. Auslander, I. Reiten	Cohen-Macaulay and Gorenstein Artin Algebras	221
J.A. Green	Classical Invariants and the General Linear Group	247
M. Isaacs	Partial characters of π-separable groups	273
J.C. Jantzen	First Cohomology Groups for Classical Lie Algebras	289

C. Bessenrodt	Endotrivial modules and the Auslander-Reiten quiver	317
E. Dieterich	Tame curve singularities with large conductor	327
R. Dipper	Polynomial representations of finite general linear groups in non-describing characteristic	343
K. Erdmann	On Auslander-Reiten components for wild blocks	371
D. Happel	On Gorenstein Algebras	389
G. Hiss	Decomposition numbers of finite groups of Lie type in non-defining characteristic	405
R. Knörr	Counting blocks of defect zero	419
B. Külshammer	Group-theoretical descriptions of ring-theoretical invariants of group algebras	425
G. Malle	Darstellungstheoretische Methoden bei der Realisierung einfacher Gruppen vom Lie Typ als Galoisgruppen	443
O. Manz	Some new developments and open questions in the character theory of finite groups	461
W. Plesken	Some applications of representation theory	477
A. Wiedemann	A construction of orders of finite global dimensions	497
W. Willems	Duality and forms in representation theory	509
