Contents	v
Preface	ix
Matching Theorems	
An exposition of Talagrand's mini-course on matching theorems <i>Marjorie G. Hahn and Yongzhao Shao</i>	3
The Ajtai-Komlos-Tusnady matching theorem for general measures <i>Michel Talagrand</i>	39
Some generalizations of the Euclidean two-sample matching problem <i>Joe Yukich</i>	55
Inequalities and Approximations	
Sharp bounds on the L_p norm of a randomly stopped multilinear form with an application to Wald's equation <i>Victor de la Peña</i>	69
On Hoffmann-Jorgensen's inequality for U-processes <i>Evarist Giné and Joel Zinn</i>	80
The Poisson counting argument: A heuristic for understanding what makes a Poissonized sum large <i>Marjorie G. Hahn and Michael J. Klass</i>	92
On the lower tail of Gaussian measures on l_p <i>Wenbo V. Li</i>	106
Conditional versions of the Strassen-Dudley Theorem <i>Ditlev Monrad and Walter Philipp</i>	116
An approach to inequalities for the distributions of infinite-dimensional martingales <i>Iosif Pinelis</i>	128
Stochastic Processes	
Random integral representations for classes of limit distributions similar to Levy class L_0 . III <i>Zbigniew J. Jurek</i>	137
Asymptotic dependence of stable self-similar processes of Chentsov-type <i>Piotr S. Kokoszka and Murad S. Taqqu</i>	152
Distributions of stable processes on spaces of measurable functions <i>Rimas Norvaiša</i>	166

Harmonizability, V-boundedness, and stationary dilation of Banach space-valued processes <i>Philip H. Richard</i>	189
Weak Convergence and Large Deviations	
Asymptotic behavior of self-normalized trimmed sums: Nonnormal limits III <i>Marjorie G. Hahn and Daniel C. Weiner</i>	209
On large deviations of Gaussian measures in Banach spaces <i>Marek Slaby</i>	228
Mosco convergence and large deviations <i>Sandy Zabell</i>	245
Strong Limit Theorems and Approximations	
A functional LIL approach to pointwise Bahadur-Kiefer theorems <i>Paul Deheuvels and David M. Mason</i>	255
The Glivenko-Cantelli theorem in a Banach space setting <i>Vladimir Dobrić</i>	267
Marcinkiewicz type laws of large numbers and convergence of moments for U-statistics <i>Evarist Giné and Joel Zinn</i>	273
Self-normalized bounded laws of the iterated logarithm in Banach spaces <i>Anant Godbole</i>	292
Rates of clustering for weakly convergent Gaussian vectors and some applications <i>Victor Goodman and Jim Kuelbs</i>	304
On the almost sure summability of B-valued random variables <i>Bernard Heinkel</i>	325
On the rate of Clustering in Strassen's LIL for Brownian Motion <i>Michel Talagrand</i>	339
Local Times of Stochastic Processes	
A central limit theorem for the renormalized self-intersection local time of a stationary process <i>Simeon M. Berman</i>	351
Moment generating functions for local times of symmetric Markov processes and random walks <i>Michael B. Marcus and Jay Rosen</i>	364
Empirical Processes and Applications	
Partial-sum processes with random lattice-points and indexed by Vapnik Červonenkis classes of sets in arbitrary sample spaces <i>Miguel A. Arcones, Peter Gaenssler, and Klaus Ziegler</i>	379

Learnability models and Vapnik-Chervonenkis combinatorics <i>Anselm Blumer</i>	390
Nonlinear functionals of empirical measures <i>Richard M. Dudley</i>	403
KAC empirical processes and the bootstrap <i>Chris A. J. Klaassen and Jon A. Wellner</i>	411
Functional limit theorems for probability forecasts <i>Deborah Nolan</i>	430
Exponential bounds in Vapnik-Červonenkis classes of index 1 <i>Daphne L. Smith and Richard M. Dudley</i>	451
Applications to Statistics and Engineering	
Tail estimates for empirical characteristic functions, with applications to random arrays <i>George Benke and W. James Hendricks</i>	469
The radial process for confidence sets <i>Rudolf Beran</i>	479
Stochastic search in a Banach space <i>P. Warwick Millar</i>	497
