PREFACE

LIST OF PARTICIPANTS

Lectures

Quelques Exemples de Fluides Newtoniens Generalisés D. CIORANESCU	1
Two Dimensional Incompressible Fluid Flow with Singular Initial Data G.-H. COTTET	32
On the Steady Stokes Flow in Exterior Domains V. GIRAULT AND A. SEQUEIRA	50
Mathematical Problems arising in Differential Models for Viscoelastic Fluids C. GUILLOPÉ AND J.-C. SAUT	64
Weak Solutions for Thermoconvective Flows of Boussinesq-Stefan Type J.-F. RODRIGUES	93
Boundary and Initial-Boundary Value Problems for the Navier-Stokes Equations in Domains with Noncompact Boundaries V.A. SOLONNIKOV	117
Stability Problems in Electrohydrodynamics, Ferrohydrodynamics and Thermo- electric Magnetohydrodynamics B. STRAUGHAN	163
Mathematical Results for Compressible Flows A. VALLI	193

Communications

Une Solution Numérique des Équations de Navier-Stokes Stationnaires O. BAN	231
Stationary Solutions for a Bingham Flow with Nonlocal Friction L. CONSIGLIERI	237
Étude de la Stabilité du Couplage des Équations d'Euler et Maxwell à une Dimension d'Espace S. FABRE	244
Diphasic Equilibrium and Chemical Engineering F. JAMES	246
Vibrations of a Viscous Compressible Fluid in Bounded and Unbounded Domains M.R. LEVITIN	251
Shock Wave in Resonant Dispersion Media YU.I. SKRYNNIKOV	256
Solitary Vortices - A New Exact Solution of Hydrodynamic Equations A. SKVORTSOV	259
