

Table of Contents

Invited Lectures

Diffusion approximation on neural networks and applications for image processing G.-H. Cottet	3
A survey on system identification M. Deistler	11
On numerical simulation in the microelectronics industry A. Gilg	23
Instabilities in roller conveyors used in flat glass manufacture D. Gelder	31
Inverse cascades in turbulence A. C. Newell	41
Numerical computation of electromagnetic fields J. Sarvas	47
Nonlinear hyperbolic systems in chromatography H. P. Urbach	57

Contributed Papers

On the mathematic modelling of kinematically related transforming rotations tooth surfaces V. Abadjiev, D. Petrova	71
Mathematical modelling of thermosyphons in cryogenic air separation plants C. J. Aldridge, A. C. Fowler	75
Stability estimate for the nonlinear seakeeping problem P. Bassanini	79
Modelling optical channel-waveguides using a domain-integral equation technique H. J. M. Bastiaansen	83
Deformation analysis of the earth by a constructive interpolation model J. Brudowsky, W. Freeden, M. Tücks	87
A barrier penetration formula for optimal tunnelling models J. Burzlaff	91

Communicating chemical processes – a transputer model of the British coal twin-bed pyrolyser/combustor A. R. Butt, M. G. Jepson, J. Moodie	95
Travelling combustion waves in porous media H. Byrne	99
Estimating nonstationary time series with missing data D. Čepar, Z. Radalj, B. Vovk	103
Matrix "Stable – Unstable" bloc triangular and diagonal forms A. Cheremensky, N. Dakev	107
Optimal friction laws for damping the forced vibrations of linear systems A. Cheremensky, N. Dakev	111
Implementation of public key and secret key cryptography on a local area network T. Coffey	115
Interface pressures in contact zones W. D. Collins, M. S. Khalil, S. Quegan, D. Smith, D. A. W. Taylor	121
Mathematical models for the transmission dynamics of the human immunodeficiency virus (HIV) in Ireland C. M. Comiskey	125
Numerical approximation in the theory of plates with transverse shear deformation C. Constanda	129
Three-dimensional conductive heat transfer from discrete periodic sources to a conductive sink M. R. D. Davies, J. Punch, P. Rodgers	133
Mathematical models for espresso coffee preparation A. Fasano, M. Primicerio, G. Baldini	137
Application of Denavit and Hartenburg coordinate frame to robot kinematics in a flexible manufacturing cell M. Finn, R. Howard-Hildige, M. Hillery	141
Hyperbolicity maps for two-phase flow problems A. D. Fitt	145
Observation of ocean waves with a synthetic aperture radar T. Gammelsaeter	149
On the solution of the hydrothermal coordination problem by decomposition A. Gangl, J. Gutenberger, Hj. Wacker	153

Vibrations of space structures W. A. Green	159
Earthquake loading on pipebridges M. Greenhow	165
Numerical treatment of a stochastic programming model for optimal power dispatch N. Gröwe, W. Römisch	169
On the scheduling of hydro power plant systems in the frame of the unit commitment problem J. Gutenberger, A. Gangl, Hj. Wacker	173
Mathematical models for flow and separation of particulate materials S. A. Halvorsen	179
PAN - a problem solving environment for numerical analysis T. Herchenröder, N. Köckler, D. Wendt	183
Improving the performance of a dynamometer which measures axial force and torque during drilling of Kevlar 49 composite R. Howard-Hilidge, W. P. Hennessy, M. Hillery	187
A quasi-likelihood Markov model for the hardenability of steel K. Huhtala	191
Implementation of an electricity load forecasting system O. Hyde, P. F. Hodnett	195
An extinction criterion for a catalytic wall reactor A. F. Jones, J. A. King-Hele	199
Extraction of transistor model parameters E. H. Lindner, U. Weinert	203
Mathematical modelling of modular lower limb prostheses E. A. Magnissalis, S. E. Solomonidis	207
Optimum shape of a cooling fin K. G. Mahmoud	211
The optimal collar J. Molenaar	215
Drag prediction for aircraft at transonic speed U. G. Nävert, Y. C-J. Sedin	221

Paths of reinforced plastic fibres and structures on blood vessel walls M. Nitschke.	225
Small drops, surface tension and contact angle S. B. G. M. O'Brien.	229
Optimal scheduling of hydrothermal power systems P. Oliveira, S. McKee, C. Coles, J. Blair-Fish.	233
Singular behaviour of eigenvalue Loci arising from an MHD instability in the presence of flow R. B. Paris, A. D. Wood, S. Stewart	237
A generalised cusum scheme for autocorrelated data M. Pereira-Leite, R. J. Rowlands.	243
Robot control based on neural networks G. M. Pfaffenzeller, P. Rentrop, G. Schmidt.	247
Computer-aided layout design Z. Pogany, I. Zsigmond	251
Optimal minimax controllers with structural constraints S. Pohjolainen, M. Laaksonen	255
System for statistical simulation analysis and optimization of linear hybrid circuits L. L. Sakalauskas.	259
Non-regular adaptive grids for 2-D gas dynamics A. A. Samarsky, A. P. Favorsky, V. F. Tishkin, V. F. Vasilevsky, K. V. Vyaznikov.	263
Steady solutions for the flow of an electro-rheological fluid between cylindrical electrodes X. Shi, R. J. Atkin, W. A. Bullough.	267
Application of interval arithmetic to solve a problem in liquid crystal modelling S. Siebert, G. Schumacher	271
Hydrodynamic problems in fibre spinning L. Terrill	275
Numerical analysis of high viscosity jet buckling B. M. Tchavdarov, S. P. Radev, A. L. Yarin	279
Stochastic scheduling for risk-levelling maintenance scheduling in electric power systems L. Varga	283

Two criteria for time series modelling comparison B. Vovk, B. Motnikar, D. Čepar	287
Coupled heat and mass transfer in a weld pool M. Vynnycky	291
The modelling of napkins J. Weickert	297
Applications of the geometrical shock correction method for solving nonlinear hyperbolic conservation laws K-D. Werner	301
Selection, purchase, capital recovery, multi-level maintenance and replacement model for a stochastically deteriorating production system G. B. Williams, R. S. Hirani	305
The manufacture of optical fibres P. Wilmott, J. N. Dewynne, J. R. Ockendon	309
Unit commitment problem by simulated annealing and an analysis of neighbourhood structure G. Zhou	313
 Industrial Design Papers	
A simple model for the shape of fibre tapers T. A. Birks, Y. W. Li, R. P. Kennedy, K. P. Oakley	319
Dispersion control in multiple layer optical fibres Y. W. Li, C. D. Hussey	323
 Mathematical Education and Industry Papers	
The experience of mathematics undergraduates during industrial placement W. J. Cromie, E. S. Gillespie	329
How can education respond to industry's needs? A. Oldknow	333
Software-oriented mathematical continuing education M. Schulz-Reese	337
