

Table of Contents

Preface	ix
List of Invited Addresses	xi
List of Contributed Talks	xii
Conference Participants	xv
List of Contributors	xxi

Chapter I: Plenary Addresses

F. Beukers, Exotic values of G -functions	3
John B. Friedlander, Irregularities in the Distribution of Primes	17
D. R. Heath-Brown, The Dirichlet Divisor Problem	31
M. Ram Murty, A Motivated Introduction to the Langlands Program	37
Michel Waldschmidt, Transcendental Numbers and Functions of Several Variables	67
F. Rodriguez Villegas and Don Zagier, Square roots of central values of Hecke L -series	81

Chapter II: Analytic Number Theory

Invited Addresses

Henryk Iwaniec, A Formula for the Fourier Coefficients of Maass Cusp Forms	103
M. Jutila, The Additive Divisor Problem and Exponential Sums	113
Hugh L. Montgomery, Distribution of Small Powers of a Primitive Root	137

Contributed Talks

A. Knopfmacher, J. Knopfmacher and R. Warlimont, Ordered Factorizations for Integers and Arithmetical Semigroups	151
Toru Nakahara, A Simple Proof for Non-Monogenesis of the Rings of Integers in some Cyclic Fields	167

Jukka Pihko, Representing integers as sums of squares and Hypothesis H	175
--	-----

Chapter III: Arithmetical Algebraic Geometry

Invited Addresses

Hendrik W. Lenstra, Jr. and Yuri G. Zarhin, The Tate Conjecture for Almost Ordinary Abelian Varieties over Finite Fields	179
V. Kumar Murty, The Notion of a Shimura Variety	195
Takayuki Oda, Galois Action on the Nilpotent Completion of the Fundamental Group of an Algebraic Curve	213
Paul Vojta, Arithmetic of Subvarieties of Abelian and Semiabelian Varieties	233

Contributed Talks

Harvey Cohn, Projection from an Algebraic Quadratic Form to Rational Quadratic Forms	239
Teresa Crespo, Construction of \tilde{S}_4 -fields and modular forms of weight 1	255
Paul Feit, A Universal Format for Local/Global Theories	261
Alan J. Laing, Shimura Reciprocity for Modular Functions with Rational Fourier Coefficients	271
Joan-C. Lario, On Serre's conjecture (3.2.4?) and vertical Weil Curves	281
Odile Lecacheux, Units in Number Fields and Elliptic Curves	293
Jaap Top, Descent by 3-isogeny and 3-Rank of quadratic fields	303
Yuri Tschinkel, Finite heights and rational points on surfaces	319

Chapter IV: Diophantine Approximation

Invited Addresses

David W. Boyd, Linear recurrence relations for some generalized Pisot sequences	333
W. Dale Brownawell, Algebraic Independence of Drinfeld Exponential and Quasi-Periodic Functions	341
Jan-Hendrik Evertse, Estimates for Discriminants and Resultants of Binary Forms	367
Julia Mueller, A note on Thue's inequality with few coefficients	381

Contributed Talks

M. J. Bertin, K -Nombres de Pisot et de Salem	391
J. Brüdern and R. J. Cook, Cubic Inequalities of Additive Type	399

Henri Faure, Discrepance et Diaphone en Dimension Un	411
Noriko Hirata-Kohno, Une Relation Entre les Points Entiers sur une Courbe Algébrique et les Points Rationels de la Jacobienne	421
Michel Langevin, Problèmes de Favard et de Lehmer Generalisés ...	435
Damien Roy, On the ν -adic independence of algebraic numbers	441
A. J. van der Poorten, Continued fractions of formal power series ..	453

Chapter V: Session in Honour of Paulo Ribenboim

Plenary Address

Andrew Granville, Paulo Ribenboim, at the time of his retirement .	469
Andrew Granville, The Kummer-Wieferich-Skula Approach to the First Case of Fermat's Last Theorem	479

Invited Addresses

S. Louboutin, R. A. Mollin, and H. C. Williams, Class groups of exponent two in real quadratic fields	499
J. Mináč, Poincaré Polynomials, Stability Indices and Number of Orderings I	515

Speeches at the Banquet in Honour of P. Ribenboim

T. M. Viswanathan, Paulo Ribenboim: three aspects of his career ..	529
Paulo Ribenboim, Response	533
