

# Table of Contents

<b>Part A: Methodology of Decision Analysis and Support</b>	<b>1</b>
<b>Decision Systems: The Relation Between Problem Specification and Mathematical Analysis</b> <i>J. Wessels</i>	<b>2</b>
<b>A1. DSS Methodology</b>	
<b>Some New Results in Interactive Approach to Multicriteria Bargaining</b> <i>L. Krus and P. Bronisz</i>	<b>21</b>
<b>A Configuration of Intelligent Decision Support Systems for Strategic Use: Concepts and Demonstrations for Group Decision Making</b> <i>F. Seo and I. Nishizaki</i>	<b>35</b>
<b>Interactive Multicriteria Decision Support: Combining Rule-based and Numerical Approaches</b> <i>K. Fedra, C. Zhao, and L. Winkelbauer</i>	<b>48</b>
<b>Application of min/max Graphs in Decision Making</b> <i>E. Nawarecki and G. Dobrowolski</i>	<b>65</b>
<b>Graphical Interaction in Multi-Criteria Decision Support Some Implementation Issues</b> <i>R. Vetschera and H. Walterscheid</i>	<b>79</b>

## A2. Multiple Criteria Optimization and Decision Theory

- Parametric Programming Approaches to Local Approximations of the Efficient Frontier** 88  
*J. Granat*
- Methods of Dynamic Multi-Criteria Problem Solutions and Their Applications** 101  
*V. A. Gorelik*
- Quantitative Pareto Analysis and the Principle of Background Computations** 112  
*I. Kaliszewski*
- Applications of Linear Approximation Structures to the Description of Linear Preference Structures** 121  
*J. G. Pachon and S. Rios-Insua*
- Smooth Relations in Multiple Criteria Programming** 130  
*V. I. Borzenko and M. V. Polyashuk*
- Pairwise Comparisons in Decision Support for Multicriteria Choice Problems** 137  
*J. Majchrzak*
- Interval Value Tradeoffs Methodology and Techniques of Multi-Criteria Decision Analysis** 144  
*V. P. Berman, G. Y. Naumow, and V. V. Podinovskii*
- Problems with Importance-Ordered Criteria** 150  
*V. V. Podinovskii*

<b>Part B: SDS Tools and Applications</b>	<b>157</b>
<b>Types of Decision Support Systems and Polish Contributions to Their Development</b> <i>A. P. Wierzbicki</i>	<b>158</b>
<b>B1. Tools</b>	
<b>An Application of the Analytic Centers to a Generic Nondifferentiable Minimization Problem</b> <i>A. Altman</i>	<b>176</b>
<b>Classification Support Based on the Rough Sets Theory</b> <i>J. Stefanowski</i>	<b>185</b>
<b>An Interactive Program for Defining Two-Dimensional Irregular Figures for Decision Support Cutting System</b> <i>J. Błażewicz, M. Drozdowski, A. Piechowiak and R. Walkowiak</i>	<b>193</b>
<b>DINAS Dynamic Interactive Network Analysis System: A Tutorial Example</b> <i>W. Ogryczak, K. Studzinski, and K. Zorychta</i>	<b>209</b>
<b>HYBRID: Multicriteria Linear Programming System for Computers under DOS and Unix</b> <i>M. Makowski and J. Sosnowski</i>	<b>223</b>
<b>Intelligent Software Tools for Building Interactive Systems</b> <i>R. Kaltinska and Z. Petrov</i>	<b>234</b>
<b>Software Tools for Multi-Criteria Programming</b> <i>V. Vassilev, A. T. Atanassov, V. Sgurev, M. Kichovich, A. Deianov, and M. Kirilov</i>	<b>247</b>

## B2. Applications

- On Engineering Applications of Interactive Multiobjective Programming Methods** 258  
*H. Nakayama*
- Modelling of Allocation of Social Resources and Decision Support** 267  
*R. Kulikowski*
- Application of Processing Meat Production Optimization System Operating as a Decision Support System** 278  
*A. Bogucka, A. Rydzewski, and W. Szymanowski*
- Competitive Selection of R&D Projects by a Decision Support System** 288  
*A. B. Petrovsky and G. I. Shepelyov*
