

# Contents

Preface

<u>I BABUSKA</u> : Recent progress in the p and h-p version of the finite element method .....	1
<u>H BRUNNER</u> : The numerical solution of initial-value problems for integro-differential equations .....	18
<u>J R CASH</u> : An adaptive deferred correction method for nonlinear two-point boundary value problems .....	39
<u>R E EWING, Y YUAN and G LI</u> : Finite element methods for the incompressible nuclear waste-disposal contamination in porous media .....	53
<u>P GAFFNEY</u> : When things go wrong .....	67
<u>D F GRIFFITHS</u> : The dynamics of some linear multistep methods with stepsize control .....	115
<u>T J R HUGHES and L P FRANCA</u> : Some new classes of mixed finite element methods .....	135
<u>R JELTSCH</u> : Order barriers for difference schemes for linear and nonlinear hyperbolic problems .....	157
<u>G LI and K MADSEN</u> : Robust nonlinear data fitting .....	176
<u>C A MICCHELLI and H PRAUTZSCH</u> : Refinement and subdivision for spaces of integer translates of a compactly supported function .....	192
<u>M J D POWELL</u> : Radial basis function approximations to polynomials .....	223
<u>D M SLOAN and B M HERBST</u> : Review of some results on modulational instabilities in nonlinear difference schemes .....	242
<u>G WANNER</u> : Study of Rosenbrock methods for stiff differential equations .....	259
<u>B WERNER</u> : Computational methods for bifurcation problems with symmetries and applications to steady states of n-box reaction-diffusion models .....	279
Submitted papers .....	294
