

Table of Contents

Distributed Action Systems	1
<i>Wilfried Brauer</i>	
Lectures on: Classical Proofs as Programs	31
<i>Robert L. Constable</i>	
Linear Logic: A Survey	63
<i>Jean-Yves Girard</i>	
Some Proof-Theoretic Aspects of Logic Programming	113
<i>Gerhard Jäger</i>	
The Safety-Progress Classification	143
<i>Edward Chang, Zohar Manna, Amir Pnueli</i>	
The Polyadic π -Calculus: A Tutorial	203
<i>Robin Milner</i>	
An Introduction to Action Semantics	247
<i>Peter D. Mosses</i>	
Minimal Logic for Computable Functions	289
<i>H. Schwichtenberg</i>	
Infinite Synchronous Concurrent Algorithms	
The Algebraic Specification and Verification of a Hardware Stack	321
<i>B. McConnell, J. V. Tucker</i>	
Four Lectures on Primitive Recursion	377
<i>Stanley S. Wainer</i>	
Structured Specifications: Syntax, Semantics and Proof Calculus	411
<i>Martin Wirsing</i>
