

CONTENTS

Introduction.	vii
Part I. KAM theory and related topics.	1
1. Benettin, G., Galgani, L., Giorgilli, A. The dynamical foundation of classical statistical mechanics and the Boltzmann-Jeans conjecture	3
2. Lochak, P., Neishtadt, A.I., Niederman, L. Stability of nearly integrable convex hamiltonian system over exponentially long times	15
3. Chierchia, L. On the stability problem for nearly-integrable hamiltonian systems	35
4. Gelfreich, V.G. Separatrices splitting for the rapidly forced pendulum	47
5. Delshams, A., Seara, T.M. Exponentially small expressions for separatrix splitting	68
6. Moser, J. An unusual variational problem connected with Mather's theory for monotone twist mappings	81
7. Burago, D. Periodic Metrics	90
8. Kuksin, S.B., Pöschel, J. On the inclusion of analytic symplectic maps in analytic hamiltonian flows and its applications	96
9. Delgado, J., Lacomba, E.A., Llibre, J., Pérez, E. Poincaré Compactification of the Kepler and the collinear three body problems	117
10. Martinez, R., Simó, C. A note on the existence of heteroclinic orbits in the planar three-body problem	129
11. Bazzani, A. KAM tori for modulated symplectic maps	140
12. Bazzani, A., Turchetti, G. Analyticity of normalizing transformations for area preserving maps	155
13. Rüssmann, H. On the frequencies of quasi-periodic solutions of analytic nearly integrable hamiltonian systems	160
14. Sevryuk, M.B. New results in the reversible KAM theory	184
Part II. Infinite dimensional dynamical systems.	201
15. Chierchia, L., Perfetti, P. Maximal almost periodic solutions for Lagrangian equations on infinite dimensional tori	203
16. Denzler, J. Nonpersistence of breather solutions under perturbation of the Sine-Gordon equation	213

Part III. Miscellanea.	225
17. Fel'shtyn, A.L. Attractors, integrable hamiltonian systems and the Reidemeister torsion	227
18. Karasev, M., Vorobjev, Yu. Linear connections for hamiltonian dynamics over isotropic submanifold	235
19. Lerman, L.M., Umanskii, Ja.L. Four-dimensional integrable hamiltonian systems with simple singular points	253
20. Osipenko, G. Periodic points and Symbolic Dynamics	261
21. Osipenko, G., Ershov, E. On the perturbation of locally non-unique invariant manifolds	268
22. Veselov, A.P. Complex geometry of the billiard on the ellipsoid and quasicrystallic curves	277
Dynamical Systems, Programme.	285
