TABLE OF CONTENTS

Preface v

An Analysis of Rates in the Presence of Extra-Variation: Results from Different Methods for Variance Component Estimation
A. Biggeri and M. Braga 1

Semiparametric Modelling and Prediction for a Variable Depending on Time and Explanatory Variables
O. Bunke 11

Estimation of Link and Variance Parameters by the GLIM Based Program DEEP
H. Busse 27

META plus GLIM, an Extended Data Analysis Environment
C. Capiluppi and A. Azzalini 35

On the Analysis of Categorical Spatial Data
A. Cerioli 45

An Analysis of the Effect of an Offender's Employment Status on the Type of Sentence Chosen by the Magistrate
N.J. Crichton and T.R.L. Fry 55

Sample Enumeration Methods for Model Interpretation
R.B. Davies 65

A Mixed Model Approach to the Analysis of Count Data
M.A.J. van Duijn 75

On Filtering and Smoothing in Dynamic Models for Categorical Longitudinal Data
L. Fahrmeir and M. Goss 85

Bootstrap Importance Sampling in Regression
A. Gigli 95

Exemplifying Longitudinal Loglinear Analysis with Latent Variables
J.A. Hagenaars 105

An Application of Regression on a Latent Variable for Time Series Data
M. Hagnell 121

On the Sensitivity of Covariate Effect Estimates to Misspecification in Parametric Event History Models
A. Hamerle and M. Moller 131

Design Techniques for Equal/Unequal Main Effects and Symmetric/ Asymmetric Interactions
J. Hendrickx and J. Lammers 149

Models for Multivariate Failure Time Data, with Application to the Survival of Twins
P. Hougaard, B. Harvald and N.V. Holm 159

Discriminant Analysis in Graphical and Hierarchical Interaction Models
E.M. Krusińska 175

Estimation in Generalized Linear Models with Covariate Measurement Error using the Theory of Misspecified Models
H. Küchenhoff 185

Sequential Models for Ordinal Response Data
A.J. Kutyłowski 195

Logistic Regression with Random Coefficients
N.T. Longford 205

Comparison of Univariate Stochastic Models, Transfer Function and Bivariate Stochastic Models
R. Mansukhani and K. Moore 215

Ridge Likelihood Estimation for Generalized Linear Regression
B.D. Marx, P.H.C. Eilers and E.P. Smith 227

Graphics for the RC(M) Association Models
L. Milan and J. Whittaker 239

Statistical Models for Educational Testing and Attitude Measurement
I.W. Molenaar 249

Joint Modelling of Mean and Dispersion
J.A. Nelder 263

Parametric Proportional Odds Changepoint Models in Survival Analysis: A Case Study Comparison with Proportional Hazards
A.A. Noura, K.L.Q. Read and M. Stasinopoulos 273

On Model Selection under the GMANOVA Model
T. Nummi 283

A Latent Class Model for the Immunophenotyping of Lymphocytes by Flow Cytometry
W.L.J. van Putten, W. de Vries and J.W. Gratama 293

Detecting Break Points in the Hazard Function in Survival Analysis
R.A. Rigby and D.M. Stasinopoulos 303

Analysis of Contingency Tables with Known Conditional Odds Ratios or Known Log-Linear Parameters
T. Rudas and H.-G. Leimer 313

Poisson Regression, Overdispersion, and Goodness-of-Fit- Statistics
L.K. Thomsen 323

On Modelling the Lifetimes of Enhanced Equipment
A.J. Watkins and D.J. Leech 333

Author Index 343
