

TABLE OF CONTENTS

FOREWORD

The Role of the Computer in Statistics	
David Cox	vii

PREFACE	ix
----------------------	----

PROLOGUE

Science, Data, Statistics and Computing	
Y. Dodge and J. Whittaker	3

I. STATISTICAL MODELLING

Graphical Regression	
R.D. Cook	11

LAPACK: A Linear Algebra Library for High-Performance Computers	
J.J. Dongarra, J.W. Demmel and S. Ostrouchov	23

PARELLA: Measurement of Latent Attitude via the Statistical Modelling of Response Processes	
H. Hoijtink	29

On Fitting Non-Stationary Markov Point Process Models on GLIM	
A.B. Lawson	35

Measuring Departure from Gaussian Assumptions in Spatial Processes	
D. Posa and M. Rossi	41

Monte Carlo Simulation on Software Mutation Test-Case Adequacy	
M. Sahinoglu, I. Baltaci and E.H. Spafford	47

Exploratory Analysis of Ordinal Repeated Measures	
S.R. Wilson	53

II. MULTIVARIATE ANALYSIS

Scaling Factors in Generalised Procrustes Analysis	
G.M. Arnold	61

Correspondance Table between Two Sets, One Partitioned, and Associated Tables	
P. Cazes and J. Moreau	67

DOMOUSE: Detection of Multivariate Outliers Using S Environment	
R. Cl��roux, J.M. Helbling and N. Ranger	71

Algorithmic Approaches for Fitting Bilinear Models A. de Falguerolles and B. Francis	77
Ordinal Principal Component Analysis P.J. Korhonen and A. Siljamäki	83
Computational Procedures for Estimation and Hypothesis Testing in Analyzing Two-Way Tables with Interaction and No Replication M. Seyedsadr and P.L. Cornelius	89
Computational Aspects of the Nearest Neighbor Statistics E. Trybus and G. Trybus	95
III. CLASSIFICATION AND DISCRIMINATION	
Discrimination through the Regularized Nearest Cluster Method L. Lebart	103
Segmentation Trees: A New Help Building Expert Systems and Neural Networks R. Araya and P. Gigon	119
Classification by Quantification of Ranking Pattern Y. Baba	125
Tree-Growing for the Multivariate Model: The RECPAM Approach A. Ciampi, L. Hendricks and Z. Lou	131
On the Level of Regularization in Regularized Discriminant Analysis C.M.L.G. Callant	137
Additive Spline Discriminant Analysis J.F. Durand	145
A New Dynamic Programming Algorithm for Cluster Analysis T. Gafner	151
StatLog: An Evaluation of Machine Learning and Statistical Algorithms R.J. Henery and C.C. Taylor	157
Discriminant Analysis of Plasma Fusion Data O.J.W.F. Kardaun, J.W.P.F. Kardaun, S.I. Itoh and K. Itoh	163
Presentation of the Method of Density Slices: An Answer to the Multitendencies Problems H. El May and R. Trémolières	171
A Two-Stage Predictive Splitting Algorithm in Binary Segmentation F. Mola and R. Siciliano	179
A Comparative Study of Two Methods of Discrete Regularized Discriminant Analysis A. Mkhadri	185

IV. SYMBOLIC AND RELATIONAL DATA

From Data to Knowledge: Probabilist Objects for a Symbolic Data Analysis E. Diday	193
Comparing Numerical and Symbolic Clustering: Application to Pseudoperiodic Light Curves of Stars P. Brito, M.O. Mennessier and H. Boughaleb	215
Description of a Knowledge Base of Symbolic Objects by Histograms F.A.T. de Carvalho and E. Diday	221
An Efficient Neural Network by a Classification Tree C. Chabanon, Y. Lechevallier and S. Millemann	227

V. GRAPHICAL MODELS

Graphical Models for Dependencies and Associations N. Wermuth and D.R. Cox	235
Model Search in Contingency Tables by CoCo J.H. Badsberg	251
Stochastic Simulation in Mixed Graphical Association Models M.J. Brewer, C.G.G. Aitken, Z. Luo and A. Gammerman	257
Recognizing Submodels of a Loglinear Model F.M. Malvestuto	263
HModel: An X Tool for Global Model Search G. Ostrouchov	269
Assessing the Power of Model Selection Procedures used when Graphical Modelling P.W.F. Smith	275

VI. TIME SERIES MODELS

Computing Missing Values in Time Series V. Gómez, A. Maravall and D. Peña	283
Forecasting Singapore's GDP Growth with a Small-Scale Model T. Abeyasinghe	297
Construction of State Space Models for Time Series Exhibiting Exponential Growth M. Akram	303
The Technique of Δ -Transformation in Econometric Data Series W. Alem, M. Karasek and W. Iskander	309
Econometric Modelling on Micro-Computers: The Impact of the New Technological Features J.L. Brillat	315
Two New Robust Methods for Time Series A.G. Bruce, R.D. Martin and V.J. Yohai	321

Forecasting Using a Semiparametric Model R. Cao, W. González-Manteiga, J.M. Prada-Sánchez, I. García-Jurado and M. Febrero-Bande	327
Computing ARMA Models with MATLAB J.F. Emmenegger	331
Analyzing Treatment Effects - The WAMASTEX Approach to Paired Sample Data K.A. Froeschl, W. Dorda and W. Grossmann	337
FORTUNE: Improving Forecasts by Tuning the Forecasting Process T. Kötter and A. Benner	343
A Comparative Study of Outlier Detection and Missing Value Estimation Methods Applied to Time Series Transport Data E.J. Redfern, S.M. Watson, S.D. Clark and M.R. Tight	349
Linking Judgements to Forecasting Models M. Talbot, T. Koetter, A. Benner, G. Rieken, A. Prenneis, J. Medding, R. Bohan, G. Hawkins, F. Kelly and Z. Luo	355
Numerical Computation of Exact Distributions for First Order Stochastic Difference Equations A.K. Tsui	359
VII. NONLINEAR REGRESSION	
Estimation of Radioimmunoassay Data Using Robust Nonlinear Regression Methods H.P. Altenburg	367
An Artificial Intelligence Approach for Modeling in Nonlinear Regression Parametric Models N. Caouder	373
Accurate Multivariable Numerical Derivatives for Inference in Nonlinear Regression R. Gonin	379
Advantages of the Approximative Interpretation - An Algorithm and Program for Finding Solutions of Large Non-Linear Problems B. Jasiński	385
Providing for the Analysis of Generalized Additive Models within a System already Capable of Generalized Linear and Nonlinear Regression P.W. Lane and T.J. Hastie	391
A Note on Local Sensitivity of Regression Estimates H. Nyquist	397
Parallel Model Analysis with Factorial Parameter Structure G.J.S. Ross	403
VIII. ROBUSTNESS AND SMOOTHING TECHNIQUES	
Time-Efficient Algorithms for Two Highly Robust Estimators of Scale C. Croux and P.J. Rousseeuw	411

Universal Consistency of Partitioning-Estimates of a Regression Function for Randomly Missing Data A. Carbonez, L. Györfi and E.C. van der Meulen	429
The Use of Slices in the LMS and the Method of Density Slices: Foundation and Comparison G. Antille and H. El May	441
On Some Statistical Properties of Bézier Curves A. Blejec	446
TRADE Regression J.B. Dijkstra	453
A Review on Smoothing Methods for the Estimation of the Hazard Rate Based on Kernel Functions O. Gefeller and P. Michels	459
Departures from Assumptions in Two-Phase Regression H.J. Kim	465
An Analysis of the Least Median of Squares Regression Problem N. Krivulin	471
Nonparametric Regression Methods for Smoothing Curves M.A.A. Moussa	477
An Inference Procedure for the Minimum Sum of Absolute Errors Regression S.C. Narula, G. Stangenhuis and P. Ferreira	481
An Operator Method for Backfitting with Smoothing Splines in Additive Models M.G. Schimek, H. Stettner and J. Haberl	487
Sensitivity Analysis in Structural Equation Models Y. Tanaka, S. Watadani and K. Inoue	493
Methods for Robust Non-Linear Regression B.C. van Zomeren	499
IX. INDUSTRIAL APPLICATIONS: PHARMACEUTICS AND QUALITY CONTROL	
Statistical Thinking in Total Quality Management: Implications for Improvement of Quality - with Ideas for Software Development T.J. Boardman and E.C. Boardman	505
Statistical Computation in the Pharmaceutical Industry A. Racine-Poon	523
Stochastic Simulations of Population Variability in Pharmacokinetics S. Guzy, C.A. Hunt and R.D. MacGregor	533
Computational Aspects in Uncertainty Analyses of Physiologically-Based Pharmacokinetic Models L. Edler	539

X. BAYESIAN STATISTICS

Simulated Annealing in Bayesian Decision Theory J.M. Bernardo	547
Generalized Linear Models and Jeffreys Priors: An Iterative Weighted Least-Squares Approach D. Firth	553
Approaches to Tobit Models via Gibbs Sampling A. Krause and W. Polasek	559
Bayesian Predictive Screening: An Efficient Approach for the Multivariate Binary, Ordinal Responses A.R. Moraes and I.R. Dunsmore	565
Author Index	571
Table of Contents of Volume Two	573
Author Index of Volume Two	577
