

CONTENTS

Preface	v
Participants	ix
From Integrable Models to Conformal Field Theories via Quantum Groups	
L.D. Faddeev	1
A brief History of hidden Quantum Symmetries in Conformal Field Theories	
C. Gómez and G. Sierra	25
<i>q</i> -Deformation of Semisimple and Non-semisimple Lie Algebras	
H. Ruegg	45
Quantum Algebras and Quantum Groups in <i>q</i> -special Function Theory	
R. Floreanini and L. Vinet	83
Lectures in Topological Quantum Field Theory	
D.S. Freed	95
Canonical Quantun Gravity and the problem of time	
C.J. Isham	157
Higher Symmetries in Lower-dimensional Models	
R. Jackiw	289
Three Lectures on Supersymmetry and Extended Objects	
P.K. Townsend	317
The Geometric Phase in Quantum Physics	
A. Bohm	347
Quantum Mechanics on Phase Space	
M. Gadella	417
Lie groups and solutions of nonlinear partial differential equations	
P. Winternitz	429
Index	497
