Preface	
<i>Preface</i>	1
List of Participants	
<i>List of Participants</i>	3
Scientific Program	
<i>Scientific Program</i>	10

PART I – Biographical Contributions

Biography of Johann Radon	
<i>Brigitte Bukovics</i>	13
Lebensgeschichte von Johann Radon	
<i>Brigitte Bukovics</i>	19
Reminiscences to Johann Radon	
<i>Leopold Schmetterer</i>	26
Reminiscences	
<i>Fritz John</i>	29
Comment	
<i>Sigurd Helgason</i>	31
My Connection with the Radon Transform	
<i>Allen M. Cormack</i>	32
On the work of Professor Fritz John	
<i>Edmund Hlawka</i>	36

PART II – Scientific contributions

The Inverse Conductivity Problem and Hyperbolic X-ray Transform	
<i>C. A. Berenstein and E. Casadio Tarabusi</i>	39
Local Inversion of the Radon Transform in Even Dimensions Using Wavelets	
<i>C. Berenstein and D. Walnut</i>	45
Inversion and Applications of the Generalized Radon Transform	
<i>G. Beylkin</i>	70
The Penrose transform on isotropic Grassmannians	
<i>J. Bureš and V. Souček</i>	81
A Paraboloidal Radon Transform	
<i>A. M. Cormack</i>	105
Parametric and Non Parametric Radon Transform	
<i>L. Ehrenpreis</i>	110

The Radon transform from the cohomological point of view <i>S. G. Gindikin</i>	123
Admissible double bundles <i>A. B. Goncharov</i>	129
Radon k-plane Transform on Projective Spaces <i>F. B. Gonzalez</i>	153
The Modified Radon Transform of Lax and Phillips in Scattering Theory <i>A. Greenleaf and G. Uhlmann</i>	161
Minimal Spheres in Lie Groups and Symmetric Spaces <i>E. L. Grinberg</i>	167
Radon Transforms for Double Fibrations: Examples and Viewpoints <i>S. Helgason</i>	175
A general setting for Wiener-Hopf Operators <i>J. Hilgert, K. H. Neeb</i>	189
Radon transform and uniform distribution <i>E. Hlawka</i>	209
Bounded domains and the zero sets of Fourier transforms <i>T. Kobayashi</i>	223
On Inversion and Range Characterization of a Transform <i>P. Kuchment</i>	240
Radon transform and curvature <i>P. W. Michor</i>	249
Radon Transformation On Real Algebraic Varieties <i>V.P. Palamodov</i>	252
Radon Transforms Satisfying the Bolker Assumption <i>E. Quinto</i>	263
Uncertainty Principles for Gelfand Pairs and Cayley Complexes <i>J. A. Wolf</i>	271

PART III – Reprinted Papers

Some Notes on the Radon Transform and Integral Geometry <i>S. G. Gindikin</i>	293
The Ultrahyperbolic Differential Equation with Four Independent Variables <i>Fritz John</i>	301
Über die Bestimmung von Funktionen durch ihre Integralwerte <i>Johann Radon</i>	324
