

# CONTENTS

Foreword .....	xi
Preface .....	xiii

## History:

The Concept of Elastic Stress in Eighteenth-Century Mechanics: Some Examples from Euler .....	1
<i>Craig G. Fraser</i>	
Book Two of Radical Principia .....	15
<i>Bruce Pourciau</i>	
Factoring the Lunar Problem: Geometry, Dynamics, and Algebra in the Lunar Theory from Kepler to Clairaut .....	39
<i>Curtis Wilson</i>	

## Theory and Applications:

A Limiting Absorption Principle for Separated Dirac Operators with Wigner von Neumann Type Potentials .....	59
<i>Horst Behncke and Peter Rejto</i>	
Lax Pairs in the Henon-Heiles and Related Families .....	89
<i>R.C. Churchill and G.T. Falk</i>	
Poincaré Compactification of Hamiltonian Polynomial Vector Fields ...	99
<i>J. Delgado, E.A. Lacomba, J. Llibre, and E. Pérez</i>	
Transverse Homoclinic Connections for Geodesic Flows .....	115
<i>Victor J. Donnay</i>	
A New Proof of Anosov's Averaging Theorem .....	127
<i>H.S. Dumas</i>	
Bifurcation in the Generalized van der Waals Interaction: The Polar Case ( $M = 0$ ) .....	137
<i>Antonio Elipe and Sebastián Ferrer</i>	

Energy Equipartition and Nekhoroshev-Type Estimates for Large Systems .....	147
<i>Antonio Giorgilli</i>	
Suspension of Symplectic Twist Maps by Hamiltonians .....	163
<i>Christophe Golé</i>	
Global Structural Stability of Planar Hamiltonian Vector Fields .....	171
<i>Xavier Jarque and Jaume Llibre</i>	
Analytic Torsion, Flows and Foliations .....	181
<i>Stephane Laederich</i>	
Linearized Dynamics of Symmetric Lagrangian Systems .....	195
<i>Debra Lewis</i>	
A 1:–1 Semisimple Hamiltonian Hopf Bifurcation in Vortex Dynamics .....	217
<i>Chjan Lim</i>	
Stability of Hamiltonian Systems over Exponentially Long Times: The Near-Linear Case .....	221
<i>Pierre Lochak</i>	
Constrained Variational Principles and Stability in Hamiltonian Systems .....	231
<i>John H. Maddocks and Robert L. Sachs</i>	
The Global Phase Structure of the Three Dimensional Isosceles Three Body Problem with Zero Energy .....	265
<i>Kenneth R. Meyer and Quidong Wang</i>	
Non-canonical Transformations of Nonlinear Hamiltonians .....	283
<i>Bruce R. Miller and Vincent T. Coppola</i>	
Linear Stability Analysis of Some Symmetrical Classes of Relative Equilibria .....	291
<i>Richard Moeckel</i>	
Identical Maslov Indices from Different Symplectic Structures .....	319
<i>W. Scherer</i>	
Discretization of Autonomous Systems and Rapid Forcing .....	329
<i>Jürgen Scheurle</i>	
Computing the Motion of the Moon Accurately .....	341
<i>Dieter S. Schmidt</i>	

On the Rapidly Forced Pendulum .....	363
<i>Prem Kumar N. Swami</i>	
Existence of Invariant Tori for Certain Non-Symplectic Diffeomorphisms .....	373
<i>Zhihong Xia</i>
