

CONTENTS

Foreword	xi
Preface	xiii
A shape optimization problem in inverse acoustics	1
<i>Giovanni Crosta</i>	
On a variational equation for thin shells	25
<i>M.C. Delfour and J.P. Zolésio</i>	
Oriented distance functions in shape analysis and optimization	39
<i>Michel C. Delfour and Jean-Paul Zolésio</i>	
On the density of the range of the semigroup for semilinear heat equations	73
<i>Caroline Fabre, Jean-Pierre Puel, and Enrique Zuazua</i>	
Relaxation in semilinear infinite dimensional systems modelling fluid flow control problems	93
<i>H.O. Fattorini and S.S. Sridharan</i>	
Multidimensional inverse scattering problems in deterministic and random media	113
<i>Semion Gutman and Michael Klibanov</i>	
Decay estimates for the wave equation	153
<i>Vilmos Komornik</i>	
Asymptotic behavior and attractors for nonlinear Von Kármán plate equations with boundary dissipation	171
<i>Irena Lasiecka</i>	
Stabilization of the Korteweg-De Vries equation on a periodic domain	195
<i>David L. Russell and Bing-Yu Zhang</i>	
A note concerning boundary effects and long time vibrations of layered media	213
<i>Fadil Santosa and Michael Vogelius</i>	
On the linearised dynamics of linked mechanical structures	229
<i>E.J.P. Georg Schmidt</i>
