

Table of Contents

Volume II

| | |
|---|------|
| Differential-geometric computational methods for nonlinear problems <i>W. Rheinboldt</i> | 1017 |
| Set-valued analysis, viability theory and partial differential inclusions <i>J. P. Aubin and H. Frankowska</i> | 1039 |
| Global stability, injectivity, and the Jacobian conjecture <i>G. H. Meisters and C. Olech</i> | 1059 |
| Theory of multipolar fluids <i>J. Nečas</i> | 1073 |
| Theory vs. relativity <i>E. Messere</i> | 1083 |
| Difference equations and inequalities: a survey <i>R. P. Agarwal</i> | 1091 |
| Invariant fiber bundles for nonautonomous difference systems <i>B. Aulbach</i> | 1109 |
| Sign properties of Green's functions for difference equations <i>P. W. Eloe and T. Peil</i> | 1121 |
| Global stability of difference equations <i>S. Elaydi</i> | 1131 |
| Singular boundary value problems for higher order difference equations <i>J. Henderson</i> | 1139 |
| Asymptotic behavior and oscillation of general nonlinear difference equations <i>E. Thandapani and B. S. Lalli</i> | 1151 |
| Permanence and global attractivity in nonlinear difference equations <i>V. L. Kocic and G. Ladas</i> | 1161 |
| Comparison theorems for a difference equation with memory <i>A. Peterson and J. Schneider</i> | 1173 |

| | |
|---|------|
| Dichotomies for differential systems with impulsive effect <i>M. Pinto</i> | 1181 |
| Soliton-like solutions of the discrete wave equation <i>F. Iavernaro and D. Trigiante</i> | 1193 |
| Examples of Lyapunov functionals for non-differentiated equations <i>T. A. Burton</i> | 1203 |
| A Lyapunov-Razumikhin method for functional differential equations <i>T. Furumochi</i> | 1215 |
| Attractivity in nonautonomous equations by Lyapunov's method <i>T. Yoshizawa</i> | 1223 |
| New directions in the method of vector Lyapunov functions via cone valued Lyapunov functions <i>A. S. Vatsala</i> | 1233 |
| A conjecture in Lyapunov method for functional differential equations <i>J. Kato</i> | 1239 |
| Stability criteria for impulsive integro-differential equations <i>M. Rama Mohana Rao and S. K. Srivastava</i> | 1247 |
| Current state of the method of vector Lyapunov functions <i>S. Leela</i> | 1255 |
| New approach to the dynamic programming for optimal control problems with state constraints <i>M. M. Khrustalev</i> | 1269 |
| Methods of stability theory for singularly perturbed problems with applications to dynamics <i>L. K. Kuzmina</i> | 1279 |
| On stability of steady motions of rigid body with liquid-filled cavity <i>V. V. Rumyantsev</i> | 1287 |
| Some new trends in Lyapunov's direct method <i>C. Corduneanu</i> | 1295 |
| Uniform asymptotic stability in functional differential equations with finite delay <i>B. Zhang</i> | 1303 |
| Stability analysis of an HIV transmission model <i>X. Liu</i> | 1313 |

| | |
|---|------|
| Stability of general ecological systems and neural networks systems <i>L. X. Xin</i> | 1325 |
| On the asymptotic stability in differential systems by Lyapunov direct method <i>L. Hatvani</i> | 1341 |
| Stability and attraction in impulsive semidynamical systems <i>S. K. Kaul</i> | 1349 |
| A universal integral invariant of non-autonomous dynamical systems <i>V. Vujčić</i> | 1357 |
| Convergence in neutral equations with infinite delay arising from active compartmental systems <i>J. Wu</i> | 1361 |
| An invariance principle of Lyapunov-Razumikhin type and compartmental systems <i>T. Krisztin</i> | 1371 |
| On the existence of almost periodic solutions of nonlinear compartmental systems with time delays <i>H. Maeda, T. Takahashi, and S. Kodama</i> | 1381 |
| On numerical solutions for a class of nonlinear delay equations with time- and state-dependent delays <i>I. Györi, F. Hartung, and J. Turi</i> | 1391 |
| Asymptotic periodicity in impulsive differential equations of retarded type with applications to compartmental models <i>I. Györi</i> | 1403 |
| Variation of parameters formula and Lipschitz stability of nonlinear matrix differential equations <i>D. Fausett and S. Köksal</i> | 1415 |
| Stability of a class of nonlinear continuous neural networks <i>L. X. Xin</i> | 1427 |
| Roughness properties of (h, k) -dichotomies <i>R. Naulin and M. Pinto</i> | 1437 |
| On the existence and qualitative properties of solutions for a nonlinear Neumann problem with critical exponent <i>Z. Q. Wang</i> | 1445 |
| Behavior of nonoscillatory solutions of forced second order neutral delay equations <i>J. R. Graef and P. W. Spikes</i> | 1457 |

| | |
|--|------|
| Regularity and asymptotics of a similarity solution of an equation arising in boundary layer theory <i>V. Marić and Z. Radašin</i> | 1469 |
| On solutions of a neutral equation with an oscillatory coefficient <i>J. R. Graef and P. W. Spikes</i> | 1475 |
| Asymptotic behavior of nonlinear neutral differential equations <i>Q. Kong</i> | 1483 |
| On oscillation of nonlinear first order differential equations with its application <i>H. Onose</i> | 1497 |
| Topological and variational approaches for nonlinear oscillation: an extension of a Bhatia result <i>M. Cecci and M. Marini, and G. Villari</i> | 1505 |
| Oscillation and nonoscillation of a class of neutral equations <i>B. G. Zhang and K. Gopalsamy</i> | 1515 |
| Positive nonlinear operators associated with isoperimetric eigenvalue problems in algebra <i>P. J. Bushell</i> | 1523 |
| Positive nonlinear systems: Some results and applications <i>U. Krause</i> | 1529 |
| Random products of contractions <i>J. M. Dye, T. Kuczumow, and S. Reich</i> | 1541 |
| Functional-differential equations with non-Volterra operator <i>M. Drakhlin and E. Litsyn</i> | 1549 |
| Searching for periodic orbits in a four dimensional symplectic map <i>A. Olvera and C. Vargas</i> | 1557 |
| Nonlinear Gravitoelectrodynamics - An Einstein's dream <i>A. Yu Sun (Y. Xin)</i> | 1565 |
| A geometric approach to optimal control <i>H. Schättler</i> | 1579 |
| A generalized implicit function theorem for equations with symmetry <i>R. I. Becker</i> | 1591 |
| Bifurcation analysis of nonuniform flow patterns in axial-flow gas compressors <i>R. A. Adomaitis and E. H. Abed</i> | 1597 |

| | |
|---|------|
| Analysis of energy balance climate models <i>G. Hetzer and P. G. Schmidt</i> | 1609 |
| A numerical method for solving nonlinear singular problems and application to bifurcation problems <i>Z. Yang and R. Ye</i> | 1619 |
| On the analysis of dynamic bifurcations and stability of solutions <i>K. Huseyin and S. Wang</i> | 1627 |
| Limit theorems for dependent random variables <i>A. Bozorgnia, R. F. Patterson, and R. L. Taylor</i> | 1639 |
| The stochastic zero-sum differential games with measurement uncertainties <i>K. M. Ramachandran</i> | 1651 |
| On certain nonlinear difference and differential equations arising from optimal choice problems <i>Z. Govindarajulu</i> | 1663 |
| Near-optimal control of a class of stochastic systems under integral constraints <i>A. N. V. Rao and C. P. Tsokos</i> | 1677 |
| Stability analysis of stochastic bilinear systems <i>P. L. Wing and A. N. V. Rao</i> | 1689 |
| Existence of solutions of nonlinear stochastic differential inclusions of Banach space <i>N. U. Ahmed</i> | 1699 |
| Bimodal nonparametric density estimation <i>H. Qiao and C. P. Tsokos</i> | 1713 |
| Conditional percentiles and their estimates for the additive model <i>Y. Wang</i> | 1727 |
| Sequential allocation for a nonlinear estimation problem <i>K. Rekab</i> | 1739 |
| Ergodic theorems for modulated stochastic processes <i>J. H. Dshalalow</i> | 1745 |
| Some new results in stochastic reaction-diffusion equations <i>M. H. Chang</i> | 1757 |
| Stochastic evolution equations with non-coercive monotone operators <i>F. Flandoli</i> | 1765 |
| Optimal control of arrival and service rates for two M/M/1 queues in series <i>M. S. Moustafa</i> | 1779 |

| | |
|--|------|
| Repairable system with differential failure modes <i>S. A. A. Emará and K. M. El-Said</i> | 1785 |
| Differential inclusions and implicit equations on closed subsets of \mathbb{R}^n <i>M. Frigon, L. Górniewica, and T. Kaczynski</i> | 1797 |
| Recent trends in the theory of nonlinear functional differential equations <i>N. V. Azbelev</i> | 1807 |
| Spherically symmetric solutions of semilinear wave equations <i>Y. Ebihara</i> | 1815 |
| Exchange of stability and bifurcation of tori in four dimensions <i>S. R. Bernfeld</i> | 1819 |
| Multivalued differential equations with time-dependent constraints <i>D. Bothe</i> | 1829 |
| Weighted inequalities with an arbitrary convex function <i>S. A. A. Emará</i> | 1841 |
| Lower semicontinuity of multivalued mappings and equilibrium points <i>K.-K. Tan and X. Z. Yuan</i> | 1849 |
| Periodicity in delay difference systems <i>S. Zhang</i> | 1861 |
| A convexification algorithm for the modeling of nonlinear dynamic processes <i>D. B. Silin and N. G. Trinko</i> | 1871 |
| On the pulse phenomenon for impulsive differential equations <i>A. V. Anokhin and A. I. Chindyapin</i> | 1881 |
| Fourier spectral methods for a class of generalized <i>KdV</i> -Burgers equations with variable coefficients <i>Z. Xiao and F. Huang</i> | 1887 |
| Structure of elastoplastic shock wave and numerical computation <i>A. Noussair</i> | 1899 |
| Automatic contours detection in image processing <i>F. Dibos, V. Caselles, T. Coll, and F. Catté</i> | 1911 |
| Second generation image coding and wavelet transform <i>J. Froment and S. Mallat</i> | 1923 |
| Segmentation by minimizing functionals and the merging methods <i>G. Koepfler</i> | 1933 |

| | |
|---|------|
| Equivalence of various characterizations of the oscillatory/nonoscillatory classification for singular endpoints of fourth order self-adjoint differential equations <i>C. T. Fulton, S. Pruess, and L. Wu</i> | 1943 |
| Taylor recurrence in analytic O.D.E.s <i>F. S. Munger</i> | 1955 |
| Asymptotic behavior of difference equations <i>R. Medina and M. Pinto</i> | 1969 |
| Oscillation of solutions of arbitrary order neutral functional differential equations with forcing terms <i>A. Zafer and R. S. Dahiya</i> | 1977 |
| Method of Lyapunov-Lagrange functions for optimization of dynamic systems with information constraints <i>S. V. Savastuk</i> | 1989 |
| Approximation methods for eigenvalue problems of Fredholm integral equations <i>E. B. Lin and X. Shen</i> | 2001 |
| Mode interaction at a triple zero point of $O(2)$ -symmetric nonlinear systems with two parameters <i>W. Wu</i> | 2011 |
