

CONTENTS

Preface	v
Dedication	vii
The honorees <i>Photos, William A. Harris, Jr., Masahiro Iwano and Yasutaka Sibuya</i>	ix
Acknowledgement	xiii
Computing Sturm-Liouville Eigenvalues for General Limit Circle Boundary Conditions <i>P. Bailey</i>	1
Use of Operators in Difference Equations <i>P. N. Bajaj</i>	7
Recent Developments in Complex Oscillation Theory <i>S. B. Bank</i>	13
Multisummability and Stokes Phenomenon for Linear Meromorphic Differential Equations <i>B. L. J. Braaksma</i>	15
On a Representation of a Fundamental System of Solutions for the Sturm-Liouville Equation and its Applications <i>N. Chernyavskaya and L. Shuster</i>	27
The Singularity Deferred Approach to the Limit <i>E. de Doncker</i>	37
Mathieu Functions with Large Parameters: The Eigenvalue Problem <i>T. M. Dunster</i>	49
Linear Differential Equations with Operator-Valued Coefficients and Asymptotic Parameters <i>S. Edelstein</i>	59

On a Generalization of Bessel Functions Satisfying Higher-Order Differential Equations	65
<i>W. N. Everitt* and C. Markett</i>	
A Mechanism for Connection	77
<i>H. Gingold</i>	
Dynamics of the Emigration Inside a Functional Economic Area (FEA)	87
<i>J. M. González</i>	
Regular Variation and Solutions of Second Order Differential Equations	97
<i>L. J. Grimm* and L. M. Hall</i>	
The Vibrated Pendulum with a Fixed Mass and a Sliding Mass	103
<i>B. Schmidt and G. Grossman*</i>	
Distribution of Real Eigenvalues in Sturm-Liouville Problems with Infinitely Many Turning Points	113
<i>H. Gingold and T. J. Hempleman*</i>	
On Radial Solutions with the Euler-Lagrange Equations of Invariant Energy Functionals	123
<i>S. M. Haidar</i>	
A Generalized Singularity of the First Kind	131
<i>W. A. Harris, Jr.* and Y. Sibuya</i>	
Persistence of Singular Perturbation Solutions in Noisy Environments	141
<i>F. C. Hoppensteadt</i>	
Globally Analytic Decompositions of a Matrix Function and a System of Differential Equations	143
<i>H. Gingold and P.-F. Hsieh*</i>	
On Summability of Formal Solutions and the Stokes Phenomenon in a Class of Difference Equations of Level 1 ⁺	153
<i>G. K. Immink</i>	
Stability of Symmetric Periodic Solutions of a Differential Delay Equation	159
<i>A. F. Ivanov</i>	

A New Method for a System of Two Nonlinear Equations without Poincaré Conditions	165
<i>M. Iwano</i>	
Uniqueness of Limit Cycles of Certain Planar Vector Fields with Codimension Two Singularities	179
<i>M. Han and K. Jiang*</i>	
Parallelization of Initial Value Problem Codes for MIMD-DM Architectures	189
<i>J. Kapenga* and I. Rattan</i>	
On Hypergeometric Functions of Confluent Type of Several Variables	199
<i>H. Kimura*, Y. Haraoka and K. Takano</i>	
Connection Problem for Hypergeometric Systems	211
<i>M. Kohno</i>	
Monotone Iterative Method for Second Order Impulsive Differential Equations	221
<i>X. Liu</i>	
On Regularizing Differential-Algebraic Equations	231
<i>L. V. Kalachev and R. E. O'Malley, Jr.*</i>	
Connection Coefficients for a Certain nth Order Differential Equation	243
<i>T. K. Puttaswamy</i>	
Synthesizing Optimal Controls for Nonlinear Systems with Nonquadratic Cost Criteria	255
<i>D. L. Russell</i>	
Solution in the Large of a Certain Third Order Differential Equation of Langer	271
<i>T. K. Puttaswamy and T. V. Sastry*</i>	
A Majorant Method for Differential Equations with a Singular Parameter	283
<i>R. Schäfke</i>	

On the Double Confluent Heun Equation <i>D. Schmidt* and G. Wolf</i>	293
Asymptotic Analysis of a Differential-Algebraic System with Shock Structure <i>S. Shao</i>	305
Geometry of Resonance Poles for 3-Dimensional Schrödinger Operator with Nearly Coulomb Potential <i>M. A. Shubov</i>	315
The Gevrey Asymptotics and Exact Asymptotics <i>Y. Sibuya</i>	325
Universal Shapes for Rotating Incompressible Fluid Drops <i>D. R. Smith* and J. E. Ross</i>	337
A Generalization of the Airy Integral for $f'' - z^n f = 0$ <i>G. G. Gundersen and E. M. Steinbart*</i>	347
Stokes Multipliers for a Generalized Weber Equation <i>T. J. Tabara</i>	349
Limiting Absorption Principle for Schrödinger Operators with Oscillating Potentials <i>P. Rejto and M. Taboada*</i>	359
Exponential Asymptotics and the Stokes Phenomenon for Nonlinear Ordinary Differential Equations <i>A. Tovbis</i>	369
On the Differential Equations $y'' + \exp(y^m - t) = 0$ <i>H. Volkmer</i>	379
A Generalization of the Levinson Theorem <i>P.-F. Hsieh and F. Xie*</i>	383
Computing Continuous Spectrum <i>A. Zettl</i>	393
