

# C O N T E N T S

J. GARCÍA-CUERVA (Madrid)	Factorization of operators and weighted norm inequalities . . .	5
H. P. HEINIG (Hamilton)	Weighted inequalities in Fourier analysis . . . . .	42
V. KOKILASHVILI (Tbilisi)	Weighted estimates for classical integral operators . . . . .	86
V. MUSTONEN (Oulu)	Mappings of monotone type: Theory and applications . . . . .	104
L. E. PERSSON (Luleå)	Generalizations of some classical inequalities and their applications . . . . .	127
G. F. ROACH (Glasgow)	Aspects of nonlinear scattering theory . . . . .	149
C. G. SIMADER (Bayreuth)	The weak Dirichlet and Neumann problem for the Laplacian in $L^q$ for bounded and exterior domains. Applications . . .	180
S. K. VODOP'YANOV (Novosibirsk)	Boundary behaviour of differentiable functions and related topics . . . . .	224
List of participants . . . . .		254
