

C O N T E N T S

Invited lectures

C. Andreian Cazacu:

Partial differential equations related to extremal problems for quasi-conformal mappings 1

J. V. Baxley:

Singularly perturbed initial value problems 15

N. W. Bazley:

Existence and bounds for the lowest critical energy of the Hartree operator 23

J. W. Bebernes:

Positive invariance and a Ważewski theorem 35

H. E. Benzinger:

An application of the Hausdorff-Young inequality to eigenfunction expansions 40

O. Boruvka:

On the central dispersions of the oscillatory differential equation $y'' = q(t)y$ with periodic coefficients 47

B. L. J. Braaksma and H. S. V. de Snoo:

Generalized translation operators associated with a singular differential operator 62

P. J. Browne:

Multi-parameter problems 78

L. Collatz:

Monotonicity with discontinuities in partial differential equations 85

A. Devinatz:

On a deficiency index theorem of W. N. Everitt 103

M. S. P. Eastham:

The essential self-adjointness of Schrödinger operators 109

D. E. Edmunds:

Nonlinear elliptic equations 118

<u>M. R. Essen:</u>		
A differential inequality with applications to subharmonic functions		130
<u>W. N. Everitt and M. Giertz:</u>		
Inequalities associated with certain partial differential operators		133
<u>M. Faierman:</u>		
The expansion theorem in multi-parameter Sturm-Liouville theory		137
<u>I. Fenyő:</u>		
On the differential equation $\sum_{r=0}^n c_r (pD_1 + qD_2)^r u = 0$		143
<u>A. Friedman:</u>		
Fundamental solutions for degenerate parabolic equations		144
<u>P. Habets:</u>		
Singular perturbations of a vector boundary value problem		149
<u>W. H. Harris Jr. and D. A. Lutz:</u>		
Asymptotic integration of linear systems		155
<u>P. Hess:</u>		
Nonlinear perturbations of linear elliptic operators		167
<u>D. B. Hinton:</u>		
Limit-point limit-circle criteria for $(pq')' + qy = \lambda ky$		173
<u>I. W. Knowles:</u>		
On the second-order differential operators of limit-circle type		184
<u>K. Kreith:</u>		
A dynamical approach to fourth order oscillations		188
<u>J. B. McLeod:</u>		
Overdetermined systems and the rectilinear steady flow of simple fluids ..		193
<u>H.-D. Niessen:</u>		
A necessary and sufficient limit-circle criterion for left-definite eigenvalue problems		205
<u>A. Pleijel:</u>		
Generalised Weyl circles		211
<u>K. Schmitt:</u>		
Existence and multiplicity of solutions of some nonlinear equations		227

<u>G. R. Sell:</u>	
The Floquet problem for almost periodic linear differential equations	239
<u>I. Stakgold:</u>	
Global estimates for nonlinear reaction and diffusion	252
<u>F. Stummel:</u>	
Perturbation theory for Sobolev spaces	267
<u>J. Weidmann:</u>	
Perturbation of self-adjoint operators in $L_2(G)$ with applications to differential operators	268
<u>J. S. W. Wong:</u>	
Square integrable solutions of L^p perturbations of second order linear differential equations	282
<u>A. Zettl:</u>	
Deficiency indices of polynomials in symmetric differential expressions	293
 <u>Contributed lectures</u>	
<u>F. M. Arscott:</u>	
Transform theorems for two-parameter eigenvalue problems in Hilbert space	302
<u>M. F. Barnsley and P. D. Robinson:</u>	
Bivariational bounds on $\langle \phi, g \rangle$ when $A\phi = f$	308
<u>B. M. Brown and W. D. Evans:</u>	
On the limit point and strong limit point classification of $2n^{\text{th}}$ order differential expressions with wildly oscillating coefficients	311
<u>E. Brändas and M. Hehenberger:</u>	
Determination of Weyl's m -coefficient for a continuous spectrum	316
<u>J. Carr and J. Dyson:</u>	
The matrix functional differential equation $y'(x) = Ay(\lambda x) + By(x)$	323
<u>G. Debney and D. Farnsworth:</u>	
Tetrad approach for a system of PDE's	329

<u>J. W. de Roever:</u>	
Quasi-analytic solutions of differential equations	334
<u>W. N. Everitt:</u>	
Integral inequalities and the Liouville transformation	338
<u>H. I. Freedman:</u>	
Hopf bifurcation with an infinite limiting period	353
<u>J. D. Gibbon, P. J. Caudrey, R. K. Bullough and J. C. Eilbeck:</u>	
N-soliton solutions of some non-linear dispersive wave equations of physical significance	357
<u>B. H. Gilding:</u>	
Continuity of generalized solutions of the Cauchy problem for the porous medium equation	363
<u>W. S. Hall:</u>	
Two timing for abstract differential equations	368
<u>S. G. Halvorsen:</u>	
Counterexamples in the spectral theory of singular Sturm-Liouville operators	373
<u>D. J. Heath and A D Wood:</u>	
Perturbation of a singular boundary value problem arising from torsional vibration of an inhomogeneous cylinder	383
<u>G. Jank:</u>	
Some function theoretical aspects in the theory of partial differential equations	388
<u>A. Källström and B. D. Sleeman:</u>	
A multi-parameter Sturm-Liouville problem	394
<u>N. G. Lloyd:</u>	
Periodic solutions of holomorphic differential equations	402
<u>S.-O. Londen:</u>	
Volterra equations on a Hilbert space	406
<u>K. Nickel:</u>	
How to get numerical convergence out of instable algorithms	411
<u>L. A. Peletier:</u>	
On the existence of an interface in nonlinear diffusion processes	412

T. Plant:

Hölder continuous nonlinear product integrals 417

G. F. Roach:

Continuous spectra and linear operator equations 422

J. Toland:

Asymptotic linearity and a class of nonlinear Sturm-Liouville problems
on the half-line 429

U. Trottenberg:

An elementary calculus for Green's functions associated with
singular boundary value problems 434

P. Volkmann:

Gewöhnliche Differentialungleichungen mit quasimonoton wachsenden
Funktionen in Banachräumen 439

L. J. Walpole:

On the integral equation method for boundary-value problems 444
