

TABLE OF CONTENTS

Table of contents	v
Editor's preface	ix
List of participants	xi
Welcome	xvii
Orthogonal Polynomials	1
Zeros of orthogonal and biorthogonal polynomials: some old, some new	
D. Lubinsky	3
Some sequences arising in the creation of new orthogonal polynomials	
J. Wimp and H. Kiesel	17
Convergence of Lagrange interpolation for Freud weights in weighted	
$L_P(\mathbb{R}), 0 < P \leq 1$	
D.M. Matjila	25
Orthogonality and boundary interpolation	
A. Bultheel, P. Gonzalez-Vera, E. Hendriksen and O. Njåstad	37
Breakdowns in the computation of orthogonal polynomials	
C. Brezinski and M. Redivo-Zaglia	49
Recurrence relations in the table of vector orthogonal polynomials	
J. Van Iseghem	61
Gegenbauer-Sobolev orthogonal polynomials	
F. Marcellán, T.E. Pérez and M.A. Piñar	71
Inverse problems: rational modifications	
A. Cachafeiro and C. Suárez	83
Normality and error formulae for simultaneous rational approximants	
to Nikishin systems	
K. Driver and H. Stahl	97
Rational Interpolation	107
The multipoint Padé table and general recurrences for rational interpolation	
M. Gutknecht	109
Matrix rational interpolation with poles as interpolation points	
M. Van Barel, B. Beckermann, A. Bultheel and G. Labahn	137
Padé-type approximants and multivariate polynomial interpolation	
P. Sablonnière	149
Rational Approximation	157
Behavior of alternation points in best rational approximation	
D. Braess, D.S. Lubinsky and E.B. Saff	159

Asymptotics and super-asymptotics for best rational approximation error norms to the exponential function (the '1/9' problem) by the Carathéodory-Fejér method	
A.P. Magnus	173
Frequency weighted H_2 model reduction	
G. Schelfhout, P. Van Overschee and B. De Moor	187
An approximation method based on the second kind Chebyshev polynomials	
M. Bozzini and M. Rossini	201
Padé Approximation	217
On the extension of Eiermann's theorem to several complex variables	
C. Rudälv	219
On the zeros of Padé approximants and Padé error functions for some classes of functions	
R.K. Kovacheva	229
Linearization of polynomial maps and singularity analysis with extended precision Padé approximants	
L. Billi and G. Turchetti	237
On algebraic computation of number of poles of meromorphic functions in the unit disk	
B. Gleyse and V. Kaliaguine	241
A comparison of acceleration techniques applied to the SOR method	
R.D. Da Cunha and T. Hopkins	247
Hermite-Padé polynomials and approximation properties	
K.A. Driver, D.S. Lubinsky and H. Wallin	261
On the efficiency of linear but nonregular sequence transformations	
E.J. Weniger	269
The accuracy-through-order and the equivalence properties in the algebraic approximant	
G.A. Baker Jr.	283
On the vector-valued Padé approximants and the vector ϵ -algorithm	
A. Salam	291
Quadrature formulas on the unit circle and two-point Padé approximation	
A. Bultheel, P. González-Vera, E. Hendriksen and O. Njåstad	303
Continued fractions	319
A survey of truncation error analysis for Padé and continued fraction approximants	
C. Craviotto, W.B. Jones and W.J. Thron	321
Truncation error bounds for limit K -periodic continued fractions	
C. Craviotto, W.B. Jones and W.J. Thron	375
Continued fractions for the symmetric strong Stieltjes moment problem	
A.K. Common and J.H. McCabe	387
Observations on indeterminate Stieltjes moment problems	
C.M. Bonan-Hamada, W.B. Jones and W.J. Thron	395

A family of classical determinate Stieltjes moment problems with discrete solutions	
W.B. Jones, W.J. Thron and N. Wyshinski	409
Convergence criteria of two-dimensional continued fractions	
K. Kuchmins'ka	423
First order linear recurrence systems and general N-fractions	
P. Levrie, M. Van Barel and A. Bultheel	433
